

SDA health message

The development of mankind is to be intellectual, moral and physical as outlined by God's Word. The result is to be a transformation of character after God's likeness. God calls for us to have an intelligence in all these areas including our health. We have to fear what God says more than anything else. Much of the standard medical practice is based on a false premise or understanding of disease because their understanding is not God given.

One primary roles God has given the SDA people is to take up the healing ministry; that is every member of the church. It is not to remain some sort of intellectual mystery and it is to be to the member's advantage when religious liberty in the near future is suppressed. We are fast approaching that time.

One reason for the Holy Spirit not being given with power to His people is the rejection of the health message. What a person believes concerning health, will determine their future and whether they live or die, particularly as we approach the end. Has not God prepared His people to be a light in the world for this very time? To have a knowledge of health and healing from a different stance to the world? Here is the critical moment but is the world going to see a light shining from His people?

Have the SDA institutions been peculiar to God's mission or joined with the universities of the world? They run along the lines of standard medical hospitals of the world, for those that can afford it.

The world through their evolutionary stand point hopes to improve on nature rather than working by an understanding of nature's laws of which they are ignorant. And then of course leading church minds by their schooling see things often, in the very same light as the world. Tell me what does medical science really understand of the basic principles of health as we compare that to church's fundamental health message given to us in 1963?

The Virus

Viruses are the focus of the world because of covid 19, which has become the opportunity to develop new generation **genetic engineering drugs**. All viruses are an outer shell of protein which encapsulates the virus' DNA (or RNA) – the genetic code with the instructions for making new copies of the virus. When we say virus, we think of 'germs,' something that must be eradicated and that thinking has been fundamental to the drug industry and passed to the general public. Such an understand does not picture the cycle of life in which we live of which the Bible speaks of. We should understand as with microbes, viruses work for or against us depending on the terrain in which they find themselves, that is for life or dust to dust, ashes to ashes. Viruses are not alive but communicate a set of instructions to the cell. The virus is alive only when it enters the cell with its message or instructions. What is wrapped up in the genetic dispatch turns out to be bad or good news depending on the terrain the virus finds itself. The virus is specific for species as for organs in the body. If it is an external threat it finds no home in a fortified system but in a compromised system is easily finds its home and delivers its payload. What are viruses? - tiny protein bubbles which regulate life such as our immune system, growth of embryos and so on.

'The human endogenous retrovirus with its genetic sequence turns on during the development stage and produces proteins. HERV-K is thought to protect the embryo from infection and help fetal development. By the time a human embryo has grown into a many cell blastocyst HERV-K is concentrated in the cells that will become the baby.' National Geographic Mysteries of a virus 02.2021 p50. Viruses were thought of as nonliving entities that infected a cell, to multiply itself and cause disease. Now we know or should understand basics, that they not only cause disease by their genetic payload but they are part of life and in fact to live, to give birth is impossible without viruses.

Every day we each breathe in over 100,000,000 viruses. We are constantly breathing and drinking viruses and they are found high up into the stratosphere as on the earth.

Mammals can carry up to 320,000 different species of viruses. To say that a virus is a parasite at this point I think is a poor analogy. Viruses make up the cycle of life. Not only is there the vertical replicating of the cell in division or reproduction but the horizontal environmental factors that are taken into the genetic makeup of the person and can be passed down genetically to offspring.

The concept of enhancing evolutionary development rather than working with nature or by its natural laws is what is behind viral labs across the world, enhancing viral virulence with gain-of-function research which I believe is a criminal act. The **Biological Weapons** Convention (BWC) signed in 1972 has meant all such further biological research carried out worldwide was said to be done in the interest of research and national health.

When you are infected with a virus a part of that virus will be *encoded in your DNA for the rest of your life*. So, a disease weakens rather than fortifies the system. Retroviruses are expressed in autoimmune disorders. It is well known that viruses are necessary for placenta development in fact it has been stated from viruses come everything; but this thought is from an evolutionary stand point. Viruses contain code that change the body's DNA and 'It has been suggested that viruses are not only necessary for the existence of placental mammals, but also for the existence of life in general.' A part of the mystery that surrounds the virus is such because science has not discovered the natural laws by which the human machinery operates. When we consider the cycle of life as given to us in Genesis 2 & 3 and understand the body operates as a clean operating system (Levitical law) we are on our way to understanding true healing.

Discovered in 1961, mRNA has been studied and understood to be a template to build the body proteins. 'An mRNA is basically like a pre-form of a protein- its sequence codes. Nucleoside-modified messenger RNA a synthetic mRNA can cause a cell to make a protein, which in turn could directly treat a disease or could function as a vaccine. Having sequenced and patented Covid 19 in the USA, vaccines were developed for COVID-19. **The vaccines developed by Pfizer and Moderna activate human proteins to take on "pathologic configurations."**

One of the main problems in new range of drug development was overcoming the body's own defence system. "The mRNA molecule is vulnerable to destruction. So, in order to protect the fragile mRNA strands while they are being inserted into our DNA they are coated with PEGylated lipid nanoparticles. This coating hides the mRNA from our immune system which ordinarily would kill any foreign material injected into the body. PEGylated lipid nanoparticles have been used in several different drugs for years. Because of their effect on immune system balance, several studies have shown them to induce allergies and autoimmune diseases. Additionally, PEGylated lipid nanoparticles have been shown to trigger their own immune reactions, and to cause damage to the liver." Dr. Frank Shallenberger

A background to mRNA medicines development

The headline reads: ‘Should the COVID-19 vaccine become mandatory for people who have no medical reason to refuse it? Should the government withhold welfare payments from those refusing to submit to the needle? Should employers be allowed to sack no-job workers?’

Bill Gates is the name often associated with new vaccination technology. ‘[Pope Francis needs help in his mission to save the global economy from the rapidly accelerating triple threat of climate change, hunger and inequality.](#)’ And to add to this, the threat of Covid and so Gates has invested in vaccination to save millions of people in the world. (that’s putting it simply without exploring other connections including his involvement with the Rockefeller foundation since 2010 and his close alliance with Dr. Fauci.) He may well be genuine but he does not belong to the children of light and sees the world in a totally different view. He sees new generation technology fixing the world with genetically modified crops and genetically engineered medicines. Genetic engineering was something the antediluvians also experimented with. (This is not stating the mRNA vaccines changes your DNA but rather is part of the new, up and coming genetic engineering technology.) Many things start with good intentions that can easily follow down a bad path.

[‘Third shot may be needed to combat new coronavirus variants, Bill Gates says’](#). So where does it end? And what of the cocktail and how will that effect one’s gut flora?

Could it be that there are many good meaning people looking at vaccination to save lives and coercion is believed to be beneficial? There is also a lot of media manipulation and herd mentality going on. Is this not a liberty of conscience issue? I think it is a God given issue for us to examine the underlying principles. ‘We are not doing the will of God if we sit in quietude, doing nothing to preserve liberty of conscience.’

In ‘project starfish’ a genuine team of scientists were present at an experiment the pentagon was behind with only one scientist present who was really aware of the purpose of the experiment. Yet it was a crime against humanity.

The power of multinational drug companies is beyond that of many countries to have a say or state at what prices pharmaceutical goods will be sold to them. Now the monopoly is even greater and growing. God must soon take the reins in His own hands.

‘A few men will combine to grasp all the means to be obtained in certain lines of business.’

It is very easy for drugs to keep spinning an income when they change form and location. (You see God gives us a little more insight than others.) It's a self-generating income- a licence to make money. It has been reported that 'The world has been taken over by ten corporations who control food, slaughterhouses, medicine and vaccines.' 'The global vaccines market size was USD 46.88 billion in 2019 and is projected to reach USD 104.87 billion by 2027, exhibiting a CAGR of 10.7% during the forecast period.' ***This is part of a new era in drug development that is being integrated in with biometrics as part of the 4th industrial revolution. This is the cusp of a new era of medicine of which Covid vaccines is just the tip. This will be applied to multiple diseases such as cancer and diabetes and so on, relying more and more on artificial intelligence (AI).*** World domination is possible like never before because of the coming AI revolution. The book, 'Keys of this Blood' said it would be the biggest change in a thousand years. Christiana Figueres of the UN in 2015, said it will be the biggest change since the industrial revolution. So, when is it coming? Can we really not see it? So, was Covid an interruption of that plan or an implementation of the plan for inclusive capitalism? It would appear from the news reports coming in from many directions that a *'1000 masked batteries' are being prepared for God's people right now!*

'Drugmakers are already discussing whether they should make a new, tuned vaccines that better protect against new variants, much like they do every year with flu shots.'

On top of this we have the conspiracies arising from past research articles on gain- of- function technology which makes a virus more virulent and Newsweek reporting 7.4 million that was given to the Wuhan lab from the US over 6 years and Fauci's involvement. (It would be interesting if this was tried in a law court for criminal investigation) Bioweapons were always ready to be developed from multiple labs around the world. Is there really no conspiracy going on?

A little-known company moderna grew from a \$56 million grant from the US defense department DARPA (The Defense Advanced Research Projects Agency - associated with the CIA), in 2014 to the place of vaccine development seen today. Could it be that the 4th industrial revolution with genetic engineering using mRNA that came from DARPA is God's saving hand? Or is it to counteract God's work? The internet which gives us all this information, from which Gates profited also came from DARPA. I believe at every step of the way Lucifer through his agents, will counterfeit the 3 angels' messages of which our health message is an important part.

The development of next-generation medicines is an interesting one and an integral part of the 4th industrial revolution taking shape now, associated with artificial intelligence. Without DARPA we would not be where we are today. mRNA drug development was considered too risky a venture for private business at the inception. DARPA is the cutting edge of weaponry, cyborgs, artificial intelligence, etc, and DNA technology. DARPA played an important role in helping Moderna establish its mRNA platform, awarding the biotech a contract and funding up to \$56 million. Bill Gates and Dr. Fauci are the names often associated with this development however Silicon Valley big

tech would be welcomed aboard later for-profit and private funding but it was a development of the US defense initiative.

The concept of world vaccination maybe a frightening concept. Polio vaccination in India resulted in an increased level of paralysis with its use but it was called non-polio flaccid paralysis, yet touted as a total success. <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6121585/> Where a person's health is compromised their immune system/ gut flora is such that they are venerable to enhanced immune response.

'Just like a flu shot': People may need to take Covid-19 vaccine annually 'for the next several years', says Johnson & Johnson CEO 10 Feb, 2021.

Something to consider is this quote: "One individual may be killed by a virus while another may have no ill effects from the same virus. By placing the identical receptor, the spike protein, on cells of everyone in a population, the genetic diversity for at least one potential receptor disappears. Everyone in the population now becomes potentially susceptible to binding with the same infectious agent." COVID-19 RNA Based Vaccines and the Risk of Prion Disease J. Bart Classen, MD

Hereditary law is also placed in the 10 commandments in which God states He visits the iniquity of the fathers upon the children unto the third and fourth generation of them that hate me; In other words, diseases are a transgression of moral and physical laws which is passed down to the 3rd and 4th generations. Of course, evolution or humanistic science, as much of Christianity is ignorant of any possible link between God's word and the benefits to humanity's health.

"In animal trials using mRNA vaccines, the mRNA experiments seemed successful as all the animals developed a robust antibody response to coronavirus. However, when the scientists exposed the vaccinated animals to the wild virus, the results were horrifying. Vaccinated animals suffered hyper-immune responses including inflammation throughout their bodies terminating with fatal lung infections." COVID-19 RNA Based Vaccines and the Risk of Prion Disease. J. Bart Classen, MD

When a person gets a vaccination, we are not expecting them to have immediate adverse effects. However, when this occurs particularly with news items relating to Pfizer it is stated these people would have died anyway because of comorbidities but that's the very reason for the vaccinations!! That's how the whole thing started. 'We needed to protect the vulnerable.'

When we consider chicken pox, we see an example of how disease works. Sooner or later shingles can appear or having had the vaccination for shingles it appears anyway. I have had people confirm this many times. Or perhaps Bell's palsy. With each infection is the life force being diminished? The system is weakened.

When you understand physiology in its truest sense, your drug bills will be very much smaller, and finally you will cease to deal out drugs at all. The physician who depends upon drug medication in his practice shows that he does not understand the delicate machinery of the human organism. He is introducing into the system a seed crop that will never lose its destroying properties throughout the

lifetime. I tell you this because I dare not withhold it. Christ paid too much for man's redemption to have his body so ruthlessly treated as it has been by drug medication. {MM 229.2}

There are principals so simple and basic that are contained in inspiration that they are not considered and not used; for which the world is dying.

We in our up- to -date thinking equate the words of Ellen White concerning drugs as belonging to her time and we do this with theology and prophecy as well. When we consider quarantine in Leviticus it was not to shut down the whole country. The countries of course are being run bankrupt. Covid has a multipurpose effect that nothing else like it could, to bring in the 'new normal.'

Is vaccination a clean means of healing? Well in the traditional vaccine there is mercury, aluminium, fish oil, beef serum, pig serum, gelatin and formaldehyde causing cancer. This is not stated in the ingredients however. Using disease to fight disease leaves the system with underlying disease or seed, and when the immune system is compromised it manifests itself. Now the mRNA vaccines are different to that which we just stated.

“No vaccine has ever worked.” Dr Shiv Chopra, PhD Microbiologist, vaccine expert.

The new vaccines have had caused blood clots leading to death in some, associated with the new vaccines but despite the ongoing reports of death, there is continued denial. Long term effects of this new technology are still unknown.

‘The regulator launched its review into the jab after 13 states across Europe suspended use of the vaccine over fears of a link to blood clots.’

The review specifically investigated seven cases of blood clots in multiple blood vessels right throughout the body (DIC) and 18 cases of cerebral venous sinus thrombosis (CVST), nine of which resulted in death. Dr Shelley Deeks (Canada), vice-chair of the National Advisory Committee on Immunisation said the updated recommendations came amid new data from Europe that suggested the risk of blood clots was potentially as high as one in 100,000, much higher than the one in 1 million risk believed before. <https://www.theguardian.com/world/2021/mar/30/canada-suspends-use-of-astrazeneca-covid-vaccine-for-those-under-55>. Yet the chief Australian health adviser Professor Paul Kelly stated the benefits outweighed the risks despite what is considered acceptable levels of risk and that’s in the face of Australia’s low number of covid 19 cases.

[The coronavirus pandemic can only be considered beaten once everyone in the world has been immunized against Covid-19, Germany's Chancellor Angela Merkel said, after she'd met with the G7 leaders at a virtual summit on Friday.](#)
[February 17, 2021](#)

The vaccines are acknowledged to “may not protect everyone...The duration of (alleged) protection against COVID-19 is currently unknown.”

[“The World Health Organization \(WHO\) warned there is no guarantee that COVID-19 vaccines will prevent people from being infected with the SARS-CoV-2 virus and transmitting it to other people.”](#)

- Vaccinated persons still need to mask and social distance because they could be able to spread the new coronavirus to others without knowing it, according to WHO and U.S. health officials.
- As with measles and polio, there is no guarantee of eliminating the SARS-CoV-2 virus through mass vaccination programs.
- There is a possibility the U.S. government will introduce “COVID-19 vaccine passports” and that some local governments and businesses will make COVID-19 vaccines mandatory, including in schools.
- Technology companies have been working on creating a digital certificate, which contains personal medical information giving evidence that an individual has been vaccinated and which can be used as a screening tool by employers and businesses.”

What is disease?

Disease is nature’s effort to free the system from toxins and impurities.

It is a sin to be sick; for all sickness is the result of transgression. Many are suffering in consequence of the transgression of their parents. They cannot be censured for their parents' sin; but it is nevertheless their duty to ascertain wherein their parents violated the laws of their being, which has entailed upon their offspring so miserable an inheritance; and wherein their parents' habits were wrong, they should change their course, and place themselves by correct habits in a better relation to health. {HR, August 1, 1866 par. 2}

Sin and disease bear to each other and the relationship of cause and effect. Sickness and premature death do not come without a cause. {Testimony Studies on Diet and Foods (1926) 197.7}

This concept of disease as nature’s way of working for our good is foreign to us and many are undeservedly affected from the result of others but all of us as individuals have a contributing part in the problem. When we think of the definition of disease, most can acknowledge that microbes work for or against us according to the environment in which they find themselves and this is a result of factors such as nutritional value of the food we choice, resting the system and efficient elimination, by which we see the body maintaining itself or we can assist the body’s restoration from disease.

What can be done for Covid 19 victims?

“The sufferers in such cases can do for themselves that which others cannot do as well for them. They should commence to relieve nature of the load they have forced upon her. They should remove the cause. ***Fast a short time, and give the stomach a chance for rest. Reduce the feverish state of the system by a careful and understanding application of water. (Blood is directed to the affected area to increase the action of white blood cells in the affected area. In the case of covid- the lungs) These efforts will help nature in her struggles to free the system of impurities.*** But generally the persons who suffer pain become impatient. ***They are not willing to use self denial, and suffer a little from hunger.*** Neither are they willing to wait the slow process of nature to build up the overtaxed energies of the system. But they are determined to obtain relief at once, take powerful drugs, prescribed by physicians. ***Nature was doing her work well, and would have triumphed, but while accomplishing her task, a foreign substance of poisonous nature was introduced. What a mistake! Abused nature has now two evils to war against instead of one. She leaves the work in which she was engaged, and resolutely takes hold to expel the intruder newly introduced into the system.*** Nature feels this double draft upon her resources, and she becomes enfeebled. ***Drugs never cure disease. They only change the form and location. Nature alone is the effectual restorer, and how much better could she perform her task if left alone to herself.*** But this privilege is seldom allowed her. If crippled nature bears up under the load, and finally accomplishes in a great measure her double task, and the patient lives, the credit is given to the physician. But if nature fails in her effort to expel the poison from the system, and the patient dies, it is called a wonderful dispensation of Providence.” Ellen G. White, Spiritual Gifts, Washington, D.C., Review and Herald Publishing Assoc. Vol. 4, 1945, 133 & 134.

The fragrance of the pine, the cedar, the fir and the eucalyptus, those native species that dotted the continent as first discovered have therapeutic properties as does peppermint oil.

Man has a natural built-in system to fight disease. The aches and pains are nature’s warnings by which the body responds, increasing white blood cells to the affected area and is nature's efforts to expel poisons such as the running nose with flu, coughing from the lungs; the mucus material is nature's effort to expel poisons. Imagine if this was not built into our system and in diseases such as Charcot associated diseases, where the nervous system is destroyed and no longer signals a problem the body destroys itself. Fortunately, we are given the signal to act upon, unfortunately, most do not understand the basics to prevent deformities that can result. We are to aid nature in these efforts to clean the system rather than tax the system with disease.

When we get the body to elicit a response by using disease to activate the body's defences there are always risks. The system is weakened and a seed remains so that when the body's defences are down it can manifest itself. Chicken pox can lead to shingles or Bell's palsy.

On top of this, the number of inoculations in a life time is being rapidly increased.

A better way of treatment

Where were the free-flowing air systems rather than air conditioning in hospitals, medical centres and nursing homes? The attention to increased cleanliness is commendable.

What attempt was made to increase blood flow to the lungs?

What means of inhalation was used to assist cleaning out the lungs?

How about intravenous vitamin C?

How about other natural immune boosters?

Such rational practical methods are not considered but rather more risky operations without informed consent. Informed consent is something seriously lacking in medical practice.

The SDA health message established in 1863 is an integral part of its unique teachings concerning life and death and the nature of man. No other Christian denomination is based with health accompanying its founding messages.

We shall see the medical missionary work broadening and deepening at every point of its progress, because of the inflowing of hundreds and thousands of streams, until the whole earth is covered as the waters cover the sea. {MM 317.3}

Every institution that bears the name of Seventh-day Adventist is to be to the world as was Joseph in Egypt, and as were Daniel and his fellows in Babylon. In the providence of God these men were taken captive, that they might carry to heathen nations the knowledge of the true God. They were to be representatives of God in our world. They were to make no compromise with the idolatrous nations with which they were brought in contact, but were to stand loyal to their faith, bearing as a special honor the name of worshipers of the God who created the heavens and the earth.--8T 153. {PM 42.2}

Exodus 15:²⁶ And said, If thou wilt diligently hearken to the voice of the Lord thy God, and wilt do that which is right in his sight, and wilt give ear to his commandments, and keep all his statutes (that

includes His health laws), I will put none of these diseases upon thee, which I have brought upon the Egyptians: for I am the Lord that healeth thee.

“There is concern that the virus, which is now constantly mutating, could re-emerge in the coming months. Only God knows what the future holds.”

Vaccines drive the mutation of the pathogen.

“Just as antibiotics breed resistance in bacteria, vaccines can incite changes that enable diseases to escape their control. Researchers are working to head off the evolution of new threats.

In a 2014 paper published in *Emerging Infectious Diseases*, researchers in Australia, led by the medical microbiologist Ruiting Lan at the University of New South Wales, collected and sequenced *B. pertussis* samples from 320 patients between 2008 and 2012. The percentage of bacteria that did not express pertactin, a protein targeted by the acellular vaccine, leapt from 5 percent in 2008 to 78 percent in 2012, which suggests that selection pressure from the vaccine was enabling pertactin-free strains to become more common. In the U.S., nearly all circulating viruses lack pertactin, according to a 2017 CDC paper. “I

think pretty much everyone agrees pertussis strain variation is shaped by vaccination,” Lan said.

Hepatitis B, a virus that causes liver damage, tells a similar story. The current vaccine, which principally targets a portion of the virus known as the hepatitis B surface antigen, was introduced in the U.S. in 1989. A year later, in a paper published in the *Lancet*, researchers described odd results from a vaccine trial in Italy. They had detected circulating hepatitis B viruses in 44 vaccinated subjects, but in some of them, the virus was missing part of that targeted antigen. Then, in a series of studies conducted in Taiwan, researchers sequenced the viruses that infected children who had tested positive for hepatitis B. They reported that the prevalence of these viral “escape mutants,” as

Two Ways That Vaccines Can Lose Effectiveness

Vaccines stimulate the immune system to make antibodies that attack features on a pathogen. Because pathogens naturally mutate, random changes in a pathogen's features can make a vaccine ineffective over time. But scientists are now seeing signs that, in some cases, the vaccines themselves can drive pathogen populations to become resistant.

HOW VACCINES WORK

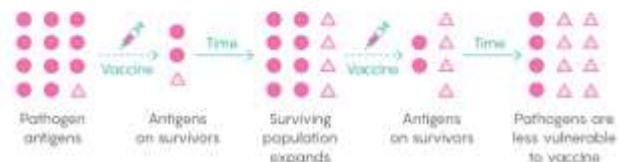

- 1 Vaccines contain antigens (protein features) of pathogens.
- 2 Vaccines stimulate the immune system to make antibodies against those antigens.
- 3 If pathogens with those antigens infect the body, the vaccinated immune system can quickly mount a defense.

Natural Evolution of Pathogens

Vaccine-Driven Evolution of Pathogens

they called them, that lacked the surface antigen had increased from 7.8 percent in 1984 to 23.1 percent in 1999.” Quanta magazine, immunology, Vaccines Are Pushing Pathogens to Evolve.

Melinda Wenner Moyer *May 10, 2018*

Gene therapies where will it end?

Does it start and end with two jabs for covid or for one condition or will be used over and over again for various diseases and how about the ongoing push for GMOs.

As NSW has lifted the ban on Genetically modified foods (GMOs) in March 2021, it reminds us of an ever-growing cocktail of changes the body will have to cope with. Straight away GMOs and Monsanto, bring danger signs to many people minds. We are told this is the way forward, reducing carbon emissions and feeding the world but people are concerned with the news Bill Gates is buying a third of US farm lands and prompting meatless substitutes and is a leading share holder in Monsanto.

The ideas of some of the medical profession is that promoting and enhancing vaccination strategies helps to reduce virally induced cancers and pesticides is not the problem in GMOs. But when we get away from nature’s laws for agriculture and human health we have problems. **‘Glyphosate residue could reach humans and animals through feed and excreted in urine. Presence of glyphosate in urine and its accumulation in animal tissues is alarming even at low concentrations.’**

<http://omicsonline.org/open-access/detection-of-glyphosate-residues-in-animals-and-humans-2161-0525.1000210.pdf>.

Reality is that the common man can know that chemical toxicity travels up the food chain and is enhanced by so doing which results in cancer- cause to the effect. ‘Our bloodstream is considered to be an environment well separated from the outside world and the digestive tract. However Complete Genes May Pass from Food to Human Blood.’

<http://www.plosone.org/article/info%3Adoi%2F10.1371%2Fjournal.pone.0069805>

Back to basics or an overview of understanding disease

Let's keep in mind the very basic definition of disease. Microbes change or morph themselves according to the environment in which they find themselves. Virus will find their target to help or hinder human development depending on the environment they find themselves. Every disease lays a dormant seed in the system's DNA and may overwhelm the immune system when immunity is low and this is affected by age, stress, the mind, the nutritional state of the person and their cleanliness. Eliciting an immune response to a vaccination on top of catching another wild strain of disease could overwhelm the system. Others have said this in another way, that there is the danger of 'enhanced immune response'.

The body works by laws of nutrition, elimination and cleanliness and these are the real defences to pathogens that are only opportunistic in a compromised system. This is the true understanding of 'homeostasis.'

Man was made of the dust or the minerals of the earth and as he continues to become nutrient rich from continuing to absorb earth's minerals as close to their natural state as possible, he rebuilds thus replenishing himself. mRNA vaccination and GMO foods could have radical results for the world that will emerge as many new diseases over time. Thus, there is a line of disease and profit created.

Jesus tells in Matthew 10:8 **Heal the sick, cleanse the lepers, raise the dead, cast out devils: freely ye have received, freely give.**

What of the future?

Many are taking the events of Covid as a decision time- A Daniel 1 moment. Is this moment shaping our prophetic future? This situation is not new. Forced vaccination has occurred before but there has never been a worldwide vaccination program. Is this in fact a call for God's people to meet the physical and spiritual needs of the world? How far are we from National Sunday laws with such an advent?

As religious aggression subverts the liberties of our nation, those who would stand for freedom of conscience will be placed in unfavorable positions. For their own sake they should, while they have opportunity, become intelligent in regard to disease, its causes, prevention, and cure. And those who do this will find a field of labor anywhere. There will be suffering ones, plenty of them, who will need help, not only among those of our own faith, but largely among those who know not the truth. The shortness of time demands an energy that has not been aroused among those who claim to believe the present truth.—Counsels on Health, p506.
