

# SDA health message

The development of mankind is to be intellectual, moral and physical as outlined by God's Word. The result is to be a transformation of character after God's likeness. God calls for us to have an intelligence in all these areas including our health. We have to fear what God says more than anything else. Much of the standard medical practice is based on a false premise or understanding of disease because their understanding is not God given.

One primary roles God has given the SDA people is to take up the healing ministry; that is every member of the church. It is not to remain some sort of intellectual mystery and it is to be to the member's advantage when religious liberty in the near future is suppressed. We are fast approaching that time.

One reason for the Holy Spirit not being given with power to His people is the rejection of the health message. What a person believes concerning health, will determine their future and whether they live or die, particularly as we approach the end. Has not God prepared His people to be a light in the world for this very time? To have a knowledge of health and healing from a different stance to the world? Here is the critical moment but is the world going to see a light shining from His people?

Have the SDA institutions been peculiar to God's mission or joined with the universities of the world? They run along the lines of standard medical hospitals of the world, for those that can afford it.

The world through their evolutionary stand point hopes to improve on nature rather than working by an understanding of nature's laws of which they are ignorant. And then of course leading church minds by their schooling see things often, in the very same light as the world. Tell me what does medical science really understand of the basic principles of health as we compare that to church's fundamental health message given to us in 1863?

## The Virus

Viruses are the focus of the world because of covid 19, which has become the opportunity to develop new generation **genetic engineering drugs**. All viruses are an outer shell of protein which encapsulates the virus' DNA (or RNA) – the genetic code with the instructions for making new copies of the virus. When we say virus, we think of 'germs,' something that must be eradicated and that thinking has been fundamental to the drug industry and passed to the general public. Such an understand does not picture the cycle of life in which we live of which the Bible speaks of. We should understand as with microbes, viruses work for or against us depending on the terrain in which they find themselves, that is for life or dust to dust, ashes to ashes. Viruses are not alive but communicate a set of instructions to the cell. The virus is alive only when it enters the cell with its message or instructions. What is wrapped up in the genetic dispatch turns out to be bad or good news depending on the terrain the virus finds itself. The virus is specific for species as for organs in

the body. If it is an external threat it finds no home in a fortified system but in a compromised system is easily finds its home and delivers its payload. What are viruses? - tiny protein bubbles which regulate life such as our immune system, growth of embryos and so on.

‘The human endogenous retrovirus with its genetic sequence turns on during the development stage and produces proteins. HERV-K is thought to protect the embryo from infection and help fetal development. By the time a human embryo has grown into a many cell blastocyst HERV-K is concentrated in the cells that will become the baby.’ National Geographic Mysteries of a virus 02.2021 p50. Viruses were thought of as nonliving entities that infected a cell, to multiply itself and cause disease. Now we know or should understand basics, that they not only cause disease by their genetic payload but they are part of life and in fact to live, to give birth is impossible without viruses.

Every day we each breathe in over 100,000,000 viruses. We are constantly breathing and drinking viruses and they are found high up into the stratosphere as on the earth.

Mammals can carry up to 320,000 different species of viruses. To say that a virus is a parasite at this point I think is a poor analogy. Viruses make up the cycle of life. Not only is there the vertical replicating of the cell in division or reproduction but the horizontal environmental factors that are taken into the genetic makeup of the person and can be passed down genetically to offspring.

The concept of enhancing evolutionary development rather than working with nature or by its natural laws is what is behind viral labs across the world, enhancing viral virulence with gain-of-function research which I believe is a criminal act. The **Biological Weapons Convention (BWC)** signed in 1972 has meant all such further biological research carried out worldwide was said to be done in the interest of research and national health.

When you are infected with a virus a part of that virus will be *encoded in your DNA for the rest of your life*. So, a disease weakens rather than fortifies the system. Retroviruses are expressed in autoimmune disorders. It is well known that viruses are necessary for placenta development in fact it has been stated from viruses come everything; but this thought is from an evolutionary stand point. Viruses contain code that change the body’s DNA and ‘It has been suggested that viruses are not only necessary for the existence of placental mammals, but also for the existence of life in general.’ A part of the mystery that surrounds the virus is such because science has not discovered the natural laws by which the human machinery operates. When we consider the cycle of life as given to us in Genesis 2 & 3 and understand the body operates as a clean operating system (Levitical law) we are on our way to understanding true healing.

Most people though ‘educated’ do not know the fundamentals of health and healing. Medical superstition has allowed people to believe that good health is mass inoculation and medicated- such is impossible and naïve. We to a large degree shall revisit medieval times because of this basic lack of understanding, allowing control over our quality of health and personal data. This should never have happened.

The body machinery works off laws. You say what laws? Such laws are evident in physics, flight, electricity etc. The laws spoken of here such as rest patterns, removing free oils, inhaling fresh air in ventilated rooms etc. **The result is to be ideally an internal clean, nutrient-rich system for self-healing.**

## **Virus & extracellular vessels or exosomes**

Years ago, I was told that some scientists believe that viruses are actually fungal spores. It did not make sense that a nonliving entity was responsible for disease- there was something wrong with the foundational premise for disease because of only relaying part of the story. A virus is not a microbe for it is not alive until it is deposited into the living host and the word virus by association to disease is actually a very poor term. Extracellular vessels, EVs are important in cell-to-cell communication as well as pathogen-to-pathogen communication. EVs are small phospholipid membrane-enclosed entities that can carry microRNA (miRNA). A miRNA is a small single-stranded non-coding RNA molecule (containing about 22 nucleotides) that functions in RNA silencing and post-transcriptional regulation of gene expression. As scientists study deeper into this subject the line blurs between a virus and an EV and are now being exploited for vaccine technology. An example of fungal EVs contain RNA, proteins, melanin, lipid, and polysaccharides. EVs are fundamental to the complex cycle of life. EVs of bacteria can protect against disease supporting commensal growth or be pathogenic promoting inflammation in the host. EVs become indistinguishable from viruses the deeper we search. EVs associated with extracellular activity in the body could be broadly known as membrane vesicles, are found in great abundance in the water we drink and the air we breathe and of course the earth we take our food from. Microbes are affected by environmental factors through membrane vesicles. The microbes or cells are transformed accordingly. Viral payloads make life and its function possible and microbes make up the gut function without which we would not have immunity, get our nutrition or be able to function at all. Microbes morph themselves according to the environment in which they are found by EVs or membrane vesicles. This determines blood flow and quality and our self-healing.

There is vertical replication of the cells but also the horizontal influences by environmental factors and the outcome depends both on internal as well as external hygiene. This makes up the cycle of life allowing recycling and the regeneration of organic matter. 'Extracellular vessels important in cell-to-cell communication or EVs, depending on the proteins and genetic material incorporated in them, play a significant role in viral infection, both facilitating and suppressing it.'

'EVs can bind to the plasma membranes of other cells, enter them either through fusion or endocytosis, and trigger specific reactions from these recipient cells. Finally, EVs carry genetic material, and this genetic material can change functions of the recipient cell.' Extracellular vesicles and viruses: Are they close relatives? Esther Nolte-’t Hoen, Tom Cremer, Robert C. Gallo, and Leonid B. Margolis

If we were to let the body become filthy inside, the gene expression through EVs would mean life-threatening parasites, bacteria and fungus would rapidly multiply and if present in a group could

cause an epidemic that would cause death and plough us back into the ground thus recycling life and cleaning up the filth.

The body has several lines of defence against attack. When the last body defence has been broken in which the person is infected by disease this becomes part of the DNA thus a weak chain remains in the system rather than strengthening immunity. When the immune system is compromised the disease returns but has changed form and location, chickenpox presents as shingles for example. Chickenpox is a very appropriate example as herpes infection (chicken pox) is possibly linked to COVID-19 vaccine, as risk increases among people with autoimmune inflammatory rheumatic diseases.

## A background to mRNA medicines development

Discovered in 1961, mRNA has been studied and understood to be a template to build the body proteins. 'An mRNA is basically like a pre-form of a protein- its sequence codes. Nucleoside-modified messenger RNA a synthetic mRNA can cause a cell to make a protein, which in turn could directly treat a disease or could function as a vaccine. Having sequenced and patented Covid 19 in the USA, vaccines were developed for COVID-19. **The vaccines developed by Pfizer and Moderna activate human proteins to take on “pathologic configurations.”**

One of the main problems in new range of drug development was overcoming the body's own defence system. “The mRNA molecule is vulnerable to destruction. So, in order to protect the fragile mRNA strands while they are being inserted into our DNA they are coated with PEGylated lipid nanoparticles. This coating hides the mRNA from our immune system which ordinarily would kill any foreign material injected into the body. PEGylated lipid nanoparticles have been used in several different drugs for years. Because of their effect on immune system balance, several studies have shown them to induce allergies and autoimmune diseases. Additionally, PEGylated lipid nanoparticles have been shown to trigger their own immune reactions, and to cause damage to the liver.” Dr. Frank Shallenberger

**The headline reads: ‘Should the COVID-19 vaccine become mandatory for people who have no medical reason to refuse it? Should the government withhold welfare payments from those refusing to submit to the needle? Should employers be allowed to sack no-jab workers?’**

Bill Gates is the name often associated with new vaccination technology. ‘Pope Francis needs help in his mission to save the global economy from the rapidly accelerating triple threat of climate change, hunger and inequality.’ And to add to this, the threat of Covid and so Gates has invested in vaccination to save millions of people in the world. (that's putting it simply without exploring other connections including his involvement with the Rockefeller foundation since 2010 and his close alliance with Dr. Fauci.) He may well be genuine but he does not belong to the children of light and sees the world in a totally different view. He sees new generation technology fixing the world with

genetically modified crops and genetically engineered medicines. Genetic engineering was something the antediluvians also experimented with. (This is not stating the mRNA vaccines changes your DNA but rather is part of the new, up and coming genetic engineering technology.) Many things start with good intentions that can easily follow down a bad path.

**'Third shot may be needed to combat new coronavirus variants, Bill Gates says'.** So where does it end? And what of the cocktail and how will that effect one's gut flora?

Could it be that there are many good meaning people looking at vaccination to save lives and coercion is believed to be beneficial? There is also a lot of media manipulation and herd mentality going on. Is this not a liberty of conscience issue? I think it is a God given issue for us to examine the underlying principles. 'We are not doing the will of God if we sit in quietude, doing nothing to preserve liberty of conscience.'

In 'project starfish' a genuine team of scientists were present at an experiment the pentagon was behind with only one scientist present who was really aware of the purpose of the experiment. Yet it was a crime against humanity.

The power of multinational drug companies is beyond that of many countries to have a say or state at what prices pharmaceutical goods will be sold to them. Now the monopoly is even greater and growing. God must soon take the reins in His own hands.

'A few men will combine to grasp all the means to be obtained in certain lines of business.'

It is very easy for drugs to keep spinning an income when they change form and location. (You see God gives us a little more insight than others.) It's a self-generating income- a licence to make money. It has been reported that **'The world has been taken over by ten corporations who control food, slaughterhouses, medicine and vaccines.'** **'The global vaccines market size was USD 46.88 billion in 2019 and is projected to reach USD 104.87 billion by 2027, exhibiting a CAGR of 10.7% during the forecast period.'** ***This is part of a new era in drug development that is being integrated in with biometrics as part of the 4th industrial revolution. This is the cusp of a new era of medicine of which Covid vaccines is just the tip. This will be applied to multiple diseases such as cancer and diabetes and so on, relying more and more on artificial intelligence (AI).*** World domination is possible like never before because of the coming AI revolution. The book, 'Keys of this Blood' said it would be the biggest change in a thousand years. Christiana Figueres of the UN in 2015, said it will be the biggest change since the industrial revolution. So, when is it coming? Can we really not see it? So, was Covid an interruption of that plan or an implementation of the plan for inclusive capitalism? It would appear from the news reports coming in from many directions that a ***'1000 masked batteries' are being prepared for God's people right now!***

**'Drugmakers are already discussing whether they should make a new, tuned vaccines that better protect against new variants, much like they do every year with flu shots.'**

On top of this we have the conspiracies arising from past research articles on gain- of- function technology which makes a virus more virulent and Newsweek reporting 7.4 million that was given to the Wuhan lab from the US over 6 years and Fauci's involvement. (It would be interesting if this was tried in a law court for criminal investigation) Bioweapons were always ready to be developed from multiple labs around the world. Is there really no conspiracy going on?

A little-known company moderna grew from a \$56 million grant from the US defense department DARPA (The Defense Advanced Research Projects Agency - associated with the CIA), in 2014 to the place of vaccine development seen today. Could it be that the 4<sup>th</sup> industrial revolution with genetic engineering using mRNA that came from DARPA is God's saving hand? Or is it to counteract God's work? The internet which gives us all this information, from which Gates profited also came from DARPA. I believe at every step of the way Lucifer through his agents, will counterfeit the 3 angels' messages of which our health message is an important part.

The development of next-generation medicines is an interesting one and an integral part of the 4th industrial revolution taking shape now, associated with artificial intelligence. Without DARPA we would not be where we are today. mRNA drug development was considered too risky a venture for private business at the inception. DARPA is the cutting edge of weaponry, cyborgs, artificial intelligence, etc, and DNA technology. DARPA played an important role in helping Moderna establish its mRNA platform, awarding the biotech a contract and funding up to \$56 million. Bill Gates and Dr. Fauci are the names often associated with this development however Silicon Valley big tech would be welcomed aboard later for-profit and private funding but it was a development of the US defense initiative.

The concept of world vaccination maybe a frightening concept. Polio vaccination in India resulted in an increased level of paralysis with its use but it was called non-polio flaccid paralysis, yet touted as a total success. <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6121585/> Where a person's health is compromised their immune system/ gut flora is such that they are vulnerable to enhanced immune response.

**'Just like a flu shot': People may need to take Covid-19 vaccine annually 'for the next several years', says Johnson & Johnson CEO 10 Feb, 2021.**

Something to consider is this quote: "One individual may be killed by a virus while another may have no ill effects from the same virus. By placing the identical receptor, the spike protein, on cells of everyone in a population, the genetic diversity for at least one potential receptor disappears. Everyone in the population now becomes potentially susceptible to binding with the same infectious agent." COVID-19 RNA Based Vaccines and the Risk of Prion Disease J. Bart Classen, MD

Hereditary law is also placed in the 10 commandments in which God states He visits the iniquity of the fathers upon the children unto the third and fourth generation of them that hate me; In other words, diseases are a transgression of moral and physical laws which is passed down to the 3rd and 4th generations. Of course, evolution or humanistic science, as much of Christianity is ignorant of any possible link between God's word and the benefits to humanity's health.

"In animal trials using mRNA vaccines, the mRNA experiments seemed successful as all the animals developed a robust antibody response to coronavirus. However, when the scientists exposed the vaccinated animals to the wild virus, the results were horrifying. Vaccinated animals suffered hyper-immune responses including inflammation throughout their bodies terminating with fatal lung infections." COVID-19 RNA Based Vaccines and the Risk of Prion Disease. J. Bart Classen, MD

When a person gets a vaccination, we are not expecting them to have immediate adverse effects. However, when this occurs particularly with news items relating to Pfizer it is stated these people would have died anyway because of comorbidities but that's the very reason for the vaccinations!! That's how the whole thing started. 'We needed to protect the vulnerable.'

When we consider chicken pox, we see an example of how disease works. Sooner or later shingles can appear or having had the vaccination for shingles it appears anyway. I have had people confirm this many times. Or perhaps Bell's palsy. With each infection is the life force being diminished? The system is weakened.

*When you understand physiology in its truest sense, your drug bills will be very much smaller, and finally you will cease to deal out drugs at all. The physician who depends upon drug medication in his practice shows that he does not understand the delicate machinery of the human organism. He is introducing into the system a seed crop that will never lose its destroying properties throughout the lifetime. I tell you this because I dare not withhold it. Christ paid too much for man's redemption to have his body so ruthlessly treated as it has been by drug medication. {MM 229.2}*

There are principles so simple and basic that are contained in inspiration that they are not considered and not used; for which the world is dying.

We in our up-to-date thinking equate the words of Ellen White concerning drugs as belonging to her time and we do this with theology and prophecy as well. When we consider quarantine in Leviticus it was not to shut down the whole country. The countries of course are being run bankrupt. Covid has a multipurpose effect that nothing else like it could, to bring in the 'new normal.'

Is vaccination a clean means of healing? Well in the traditional vaccine there is mercury, aluminium, fish oil, beef serum, pig serum, gelatine and formaldehyde causing cancer. This is not stated in the ingredients however. Using disease to fight disease leaves the system with underlying disease or seed, and when the immune system is compromised it manifests itself. Now the mRNA vaccines are different to that which we just stated.

**"No vaccine has ever worked." Dr Shiv Chopra, PhD Microbiologist, vaccine expert.**

The new vaccines have had caused blood clots leading to death in some, associated with the new vaccines but despite the ongoing reports of death, there is continued denial. Long term effects of this new technology are still unknown.

'The regulator launched its review into the jab after 13 states across Europe suspended use of the vaccine over fears of a link to blood clots.'

The review specifically investigated seven cases of blood clots in multiple blood vessels right throughout the body (DIC) and 18 cases of cerebral venous sinus thrombosis (CVST), nine of which resulted in death. Dr Shelley Deeks (Canada), vice-chair of the National Advisory Committee on Immunisation said the updated recommendations came amid new data from Europe that suggested the risk of blood clots was potentially as high as one in 100,000, much higher than the one in 1 million risk believed before. <https://www.theguardian.com/world/2021/mar/30/canada-suspends-use-of-astrazeneca-covid-vaccine-for-those-under-55>. Yet the chief Australian health adviser Professor Paul Kelly stated the benefits outweighed the risks despite what is considered acceptable levels of risk and that's in the face of Australia's low number of covid 19 cases.

[The coronavirus pandemic can only be considered beaten once everyone in the world has been immunized against Covid-19, Germany's Chancellor Angela Merkel said, after she'd met with the G7 leaders at a virtual summit on Friday.](#)  
[February 17, 2021](#)

The vaccines are acknowledged to “may not protect everyone...The duration of (alleged) protection against COVID-19 is currently unknown.”

[“The World Health Organization \(WHO\) warned there is no guarantee that COVID-19 vaccines will prevent people from being infected with the SARS-CoV-2 virus and transmitting it to other people.](#)

- Vaccinated persons still need to mask and social distance because they could be able to spread the new coronavirus to others without knowing it, according to WHO and U.S. health officials.
- As with measles and polio, there is no guarantee of eliminating the SARS-CoV-2 virus through mass vaccination programs.
- There is a possibility the U.S. government will introduce “COVID-19 vaccine passports” and that some local governments and businesses will make COVID-19 vaccines mandatory, including in schools.
- Technology companies have been working on creating a digital certificate, which contains personal medical information giving evidence that an individual has been vaccinated and which can be used as a screening tool by employers and businesses.”

## **The argument for the aged & venerable**

The argument goes from the onset of covid 19, that we need to do the social distancing and lockdowns for the venerable. But this was not just isolated to those with impaired immune systems and chronic diseases, this was for everyone. Then we heard you need to get vaccinated for the people you love and by not doing so you were being irresponsible.

The reality is that those that do not follow hygiene health laws are irresponsible to themselves and others but that is their choice just like choosing to smoke cigarettes. The focus of government health agencies was on environmental hygiene however this did not include getting out in the fresh air or

making sure there were free flowing air systems in nursing homes and hospitals. The reality is that these facilities because of the enclosures put visitors, staff and the venerable at risk.

Many are totally ignorant of health principals and that is because of the money made in the medical industry by big pharma and poor education, at school and tertiary levels. A vegan eating 2 quality meals a day, with plenty of outdoor activity and exercise, fresh air, water, good rest patterns and no drug or substance abuse is headed toward making a hydrated nutrient rich, clean internal environment that promotes good microbial gut flora.

We heard after a short time that some people with comorbidities, that is the vulnerable, were dying from complications after vaccination. So, through the media, politicians, and medical elite the whole phycology of the argument was reversed. The venerable are at risk of covid and need to be careful and with the vaccination the venerable are placed at further risk. Further risk does not necessarily mean sudden death within weeks of vaccination or side effects but for many there were these immediate consequences, from high fever, to being temporarily paralysed, to stopping the mistral cycle, to clots on the brain, which was for the most part remain unpublished. Many foolishly stated, you see I was vaccinated and it didn't affect me. There will be side effects that will not be realised for years to come that remain dormant until the immune system is compromised further, allowing a worse disease to manifest itself. The pharmaceutical industry just made a self-perpetuating problem and income with multiple diseases that will eventuate and require new generation drug gene therapy. Now in New York and many other places, the mandate is get vaccinated if you want a normal life and to participate in this city.

## Hospitalized or fatal COVID-19 vaccine breakthrough cases reported to CDC as of August 2, 2021

As of August 2, 2021, [more than 164 million people](#) in the United States had been fully vaccinated against COVID-19.

During the same time, CDC received reports from 49 U.S. states and territories of 7,525 patients with COVID-19 vaccine breakthrough infection who were hospitalized or died.

Hospitalized or fatal vaccine breakthrough cases reported to CDC		7,525
Female	3,615	(48%)
People aged ≥65 years	5,557	(74%)
Asymptomatic infections	1,347	(18%)
Hospitalizations*	7,101	(94%)
Deaths*	1,507	(20%)

"These are people who died from COVID, from complications of COVID, despite being vaccinated because the vaccine is not 100% [effective] and people with weakened immune systems, people who are a little bit older, and some people for reasons we don't really understand, might not mount a full immune response to the vaccine," Dr. Joseph

Kanter, Louisiana state health officer and medical director. This was stated after 27 people between the ages of 28 and 93 died with COVID more than two weeks after being fully vaccinated.

# ‘Pfizer has a long track record of fines and Moderna has never produced a successful vaccine but you will still be rolling up your sleeves for their respective vaccine!’

Richard Horton, editor of the Lancet, opined: “Even scientific journals, supposedly the neutral arbiters of quality by virtue of their much-vaunted process of critical peer review, are owned by publishers and scientific societies that derive and demand huge earnings from advertising by drug companies and from the sale of commercially valuable content.” Additionally, Horton believes medical “journals have devolved into information-laundering operations for the pharmaceutical industry.” Richard Smith, a former editor and chief executive of the British Medical Journal for 13 years, published an article entitled: “Medical Journals Are an Extension of the Marketing Arm of Pharmaceutical Companies.” In it, he shows the multifaceted approach drug companies use to manipulate data and gain influence over physicians and peer review publications. In another article, he reveals the peer review process to be “slow, expensive, ineffective, something of a lottery, prone to bias and abuse, and hopeless at spotting errors and fraud.” According to Smith, even though peer review is considered a “sacred process,”

studies reveal its assumed benefits are difficult to establish. An article written by Vedula et al., observed a systematic effort by Pfizer, a drug company, to distort scientific findings and deliver misinformation to healthcare providers about their drugs. For these activities, Pfizer was fined \$2.3 billion in 2009. Part of the reason for the large fine is due to Pfizer engaging in bribery with medical officials. It would be nice if Pfizer was a lone actor or “bad apple,” but the evidence and legal penalties reveal otherwise. David Klemperer, a professor

of sociology at the University of Regensburg, examined the corrupting influence of the drug industry on the peer review process and wrote: “There is no secret to how the desired results are fabricated. It is possible to give a study a spin into the desired direction at any stage of the research process.

The results will differ according to what the research question is, which of the possible end points are included, which patients are included or excluded, what is being compared, and which study period is selected. In the evaluation, it is common practice to change primary and secondary endpoints without disclosure. Suppressing results that might constitute an obstacle to marketing a substance, as well as the re-interpretation of negative and unclear results as positive results, are further methods of manipulation. Pharmaceutical companies often leave both doctors and patients in the dark about the real effects of their products. The knowledge base on which we as doctors

reach decisions with our patients is often distorted, and doctors thus often unwittingly put their patients at risk.” Vaccination *Timothy Perenich & Michael Farris*

# FDA Safety Surveillance of COVID-19 Vaccines : DRAFT Working list of possible adverse event outcomes

The CDC and FDA had a good idea of what was to eventuate from the vaccinations as listed in October 2020 by these organisations before the release of the vaccines. This should be no surprise but underlines the true nature of drug therapies. The concern is when as is occurring now there are more deaths from vaccines as reported by government agencies than deaths from covid.

Pfizer and Moderna use Polyethylene glycol 2000 to punch holes in the Brian Barrier and deliver chemical inside the shots to brain material with the potential to cause nerve damage. Johnson and Johnson has Polysorbate 80 which delivers a transgene, a double stranded DNA. These deliver genetically modified material to the brain to get your body to produce spike proteins. mRNA makes its way into your DNA and makes the DNA spike proteins on the cell's exterior, to make your own cells look like the coronavirus. Your body produces antibodies to attack your cells. Approx. 50 billion spike proteins are produced. The spike protein is what gives the coronavirus family of viruses their name. The spikes jut out from the surface of the spherical virus, giving it a crown-like halo, hence "corona".

## Covid 19 is a vascular disease

The paper, published on April 30, 2021, in *Circulation Research*, also shows conclusively that COVID-19 is a vascular disease, demonstrating exactly how the SARS-CoV-2 virus damages and attacks the vascular system on a cellular level.

*Trends Cardiovasc Med*, 2021 Jan; 31(1): 1–5.  
Published online 2020 Oct 14. doi: [10.1016/j.tcm.2020.10.005](https://doi.org/10.1016/j.tcm.2020.10.005) PMID: [33068723](https://pubmed.ncbi.nlm.nih.gov/33068723/) PMCID: [PMC7556303](https://pubmed.ncbi.nlm.nih.gov/PMC7556303/)

### COVID-19 – A vascular disease

#### Abstract

Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) leads to multi-system dysfunction with emerging evidence suggesting that SARS-CoV-2-mediated endothelial injury is an important effector of the virus. Potential therapies that address vascular system dysfunction and its sequelae may have an important role in treating SARS-CoV-2 infection and its long-lasting effects.

**Keywords:** Endothelium, Coagulation, Thrombosis, Inflammation, Microvessels

#### SARS-CoV-2 infection and vascular dysfunction

In health, the vascular endothelium maintains homeostasis through regulation of immune

“The findings help explain COVID-19’s wide variety of seemingly unconnected complications, and could open the door for new research into more effective therapies. A lot of people think of it as a respiratory disease, but it’s really a vascular disease,” says Assistant Research Professor Uri Manor, who is co-senior author of the study. “That could explain why some people have strokes, and why some people have issues in other parts of the body. The commonality between them is that they all have vascular underpinnings. Salk researchers collaborated with scientists at the University of California San Diego on the paper, including co-first author Jiao Zhang

and co-senior author John Shyy, among others. While the findings themselves aren't entirely a surprise, the paper provides clear confirmation and a detailed explanation of the mechanism through which the protein damages vascular cells for the first time. There's been a growing consensus that SARS-CoV-2 affects the vascular system, but exactly how it did so was not understood. Similarly, scientists studying other coronaviruses have long suspected that the spike protein contributed to damaging vascular endothelial cells, but this is the first time the process has been documented. In the new study, the **researchers created a "pseudovirus" that was surrounded by SARS-CoV-2 classic crown of spike proteins, but did not contain any actual virus. Exposure to this pseudovirus resulted in damage to the lungs and arteries of an animal model—proving that the spike protein alone was enough to cause disease.** Tissue samples showed inflammation in endothelial cells lining the pulmonary artery walls. **The team then replicated this process in the lab, exposing healthy endothelial cells (which line arteries) to the spike protein. They showed that the spike protein damaged the cells by binding ACE2. This binding disrupted ACE2's molecular signaling to mitochondria (organelles that generate energy for cells), causing the mitochondria to become damaged and fragmented.** Previous studies have shown a similar effect when cells were exposed to the SARS-CoV-2 virus, but this is the first study to show that the damage occurs when cells are exposed to the spike protein on its own. **"If you remove the replicating capabilities of the virus, it still has a major damaging effect on the vascular cells, simply by virtue of its ability to bind to this ACE2 receptor, the S protein receptor,** now famous thanks to COVID," Manor explains. "Further studies with mutant spike proteins will also provide new insight towards the infectivity and severity of mutant SARS CoV-2 viruses." The researchers next hope to take a closer look at the mechanism by which the disrupted ACE2 protein damages mitochondria and causes them to change shape.

### **What this also tells us is protein structural damage causes the disease.**

The spike protein causes the diseases as listed by CDC and FDA PDF-

- Guillain-Barré syndrome
- Acute disseminated encephalomyelitis
- Transverse myelitis- (paralysing sensory and motor nerves)
- Encephalitis/myelitis/encephalomyelitis/ meningoencephalitis/meningitis/ encephalopathy
- Convulsions/seizures
- Stroke
- Narcolepsy and cataplexy
- Anaphylaxis
- Acute myocardial infarction
- Myocarditis/pericarditis
- Autoimmune disease
- Deaths
- Pregnancy and birth outcomes

- Other acute demyelinating diseases
- Non-anaphylactic allergic reactions
- Thrombocytopenia
- Disseminated intravascular coagulation
- Venous thromboembolism
- Arthritis and arthralgia/joint pain
- Kawasaki disease
- Multisystem Inflammatory Syndrome in Children
- Vaccine enhanced disease

In the USA- VAERS data released by the CDC showed a total of 441,931 reports of adverse events from all age groups following COVID vaccines, including 6,985 deaths and 34,065 serious injuries between Dec. 14, 2020 and June 25, 2021.

From the 6/25/2021 release of VAERS data:		
Found 411,931 cases where Vaccine is COVID19		
Table		
<div> <div>↓</div> Event Outcome </div>	<div> <div>↑ ↓</div> Count </div>	Percent
Death	6,985	1.7%
Permanent Disability	5,852	1.42%
Office Visit	77,819	18.89%
Emergency Room	56	0.01%
Emergency Doctor/Room	54,551	13.24%
Hospitalized	23,208	5.63%
Hospitalized, Prolonged	49	0.01%
Recovered	150,590	36.56%
Birth Defect	205	0.05%
Life Threatening	6,898	1.67%
Not Serious	162,885	39.54%
<b>TOTAL</b>	<b>† 489,098</b>	<b>† 118.73%</b>
† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 411,931 (the number of cases found), and the Total Percentage is greater than 100.		

“The EU-15,472 Dead 1.5 Million Injured (50% Serious) Reported in European Union’s Database of Adverse Drug Reactions for COVID-19 Shots. *The European database of suspected drug reaction reports is [EudraVigilance](#), but EudraVigilance is only for countries in Europe who are part of the European Union (EU), which comprises 27 countries.*”

Brian Shilhavy, Global Research, June 22, 2021

The European database of suspected drug reaction reports is [EudraVigilance](#), which also tracks reports of injuries and deaths following the experimental COVID-19 “vaccines.”

A subscriber from Europe recently emailed us and reminded us that this database maintained at EudraVigilance is only for countries in Europe who are part of the European Union (EU), which comprises 27 countries.

The total number of countries in Europe is much higher, almost twice as many, numbering around 50, although there are some differences of opinion as to which countries are technically part of Europe.

So as high as these numbers are, they do NOT reflect all of Europe. The actual number in Europe who are reported dead or injured due to COVID-19 shots would be much higher than what we are reporting here.

The EudraVigilance database reports that through June 19, 2021 there are **15,472 deaths and 1,509,266 injuries** ..

From the total of injuries recorded, half of them (753,657) are **serious** injuries.

*“**Seriousness** provides information on the suspected undesirable effect; it can be classified as ‘serious’ if it corresponds to a medical occurrence that results in **death**, is life-threatening, requires inpatient hospitalisation, results in another medically important condition, or prolongation of existing hospitalisation, results in persistent or significant disability or incapacity, or is a congenital anomaly/birth defect.”*

A Health Impact News subscriber in Europe ran the reports for each of the four COVID-19 shots we are including here. This subscriber has volunteered to do this, and it is a lot of work to tabulate each reaction with injuries and fatalities, since there is no place on the [EudraVigilance](#) system we have found that tabulates all the results.

Since we have started publishing this, others from Europe have also calculated the numbers and confirmed the totals.

Here is the summary data through June 19, 2021.

**Total reactions** for the experimental mRNA vaccine **Tozinameran** (code **BNT162b2, Comirnaty**) from **BioNTech/ Pfizer**: **7,420 deaths** and **560,256 injuries** to 19/06/2021

- 16,133 Blood and lymphatic system disorders **incl. 81 deaths**
- 12,637 Cardiac disorders **incl. 964 deaths**
- 101 Congenital, familial and genetic disorders **incl. 6 deaths**
- 7000 Ear and labyrinth disorders **incl. 4 deaths**
- 265 Endocrine disorders **incl. 1 death**
- 8,122 Eye disorders **incl. 17 deaths**
- 51,030 Gastrointestinal disorders **incl. 348 deaths**
- 155,486 General disorders and administration site conditions **incl. 2,290 deaths**
- 468 Hepatobiliary disorders **incl. 31 deaths**
- 6,110 Immune system disorders **incl. 32 deaths**
- 17,549 Infections and infestations **incl. 762 deaths**

- 6,275 Injury, poisoning and procedural complications **incl. 104 deaths**
- 13,249 Investigations **incl. 285 deaths**
- 4,162 Metabolism and nutrition disorders **incl. 139 deaths**
- 79,125 Musculoskeletal and connective tissue disorders **incl. 88 deaths**
- 325 Neoplasms benign, malignant and unspecified (incl. cysts and polyps) **incl. 23 deaths**
- 100,895 Nervous system disorders **incl. 780 deaths**
- 384 Pregnancy, puerperium and perinatal conditions **incl. 10 deaths**

Headline says, “100s of young people, 16 to 24-year-olds, Suffer Heart Inflammation Following COVID Vaccines”

Does anyone else not find it odd that after discovering 800 cases in the VAERS database the “emergency” meeting is in 7 days? ... and in the meantime, every public health authority figure is encouraging parents to get their young children vaccinated? TYLER DURDEN

FRIDAY, JUN 11, 2021 As *The Epoch Times'* Zachary Stieber detailed earlier, Federal authorities have received over

800 reports of heart inflammation in people who received a COVID-19 vaccine, a health official said Thursday.

**Preliminary myocarditis/pericarditis reports to VAERS following mRNA vaccination with dose number documented (data thru May 31, 2021)**

Manufacturer	Myocarditis/pericarditis reports after dose 1	Myocarditis/pericarditis reports after dose 2
<b>Pfizer-BioNTech</b> (488 total reports)	116	372
<b>Moderna</b> (301 total report)	100	201
	216	573

Total reports after dose 1: 216  
Total reports after dose 2: 573

\* Includes total preliminary reports identified through VAERS database searches for reports with myocarditis/pericarditis MedDRA codes and pre-screened VAERS reports with signs and symptoms consistent with myocarditis/pericarditis (and with dose number documented)

- Follow-up, medical record review, application of CDC working case definition, and adjudication is ongoing or pending

## Update

(2000ET): The

Centers for Disease Control and Prevention announced Thursday that it will convene an “emergency meeting” of its advisers on June 18th to discuss rare but higher-than-expected reports of heart inflammation following doses of the mRNA-based Pfizer and Moderna COVID-19 vaccines.

The new details about myocarditis and pericarditis emerged first in presentations to a panel of independent advisers for the Food and Drug Administration, who are meeting Thursday to discuss how the regulator should approach emergency use authorization for using COVID-19 vaccines in younger children.

As CBS reports, the CDC previously disclosed that reports of heart inflammation were detected mostly in younger men and teenage boys following their second dose, and that there was a “higher number of observed than expected” cases in 16- to 24-year-olds. **Last month, the CDC urged providers to “ask about prior COVID-19 vaccination” in patients with symptoms of heart inflammation.**

We’ll leave the judgment up to someone far more qualified...

Does anyone else not find it odd that after discovering 800 cases in the VAERS database the **“emergency” meeting is in 7 days?** ... and in the meantime, every public health authority figure is **encouraging parents to get their young children vaccinated?**

A case report examining myocarditis in seven adolescents following vaccination with Pfizer’s jab, published in Pediatrics, the journal of the American Academy of Pediatrics, this month, said all seven developed the inflammation within 4 days of receiving the second dose, did not have evidence of COVID-19 infection, and did not meet the criteria for MIS-C, a rare disease.

The seven males, between the ages of 14 and 19, all required hospital care but each was eventually discharged.

Authors, who did not respond to requests for comment, said no link has been established between the vaccines and myocarditis and that the benefits of the vaccines outweigh the risks. But they also urged healthcare workers “to consider myocarditis in the evaluation of adolescents and young adults who develop chest pain after COVID-19 vaccination.”

A commentary on the study published in the same journal, said “there are some concerns regarding this case series that might suggest a causal relationship and therefore warrant further analysis through established surveillance systems.”

*“First, the consistent timing of symptoms in these seven cases after the second vaccination suggests a uniform biological process. Second, the similarities in clinical findings and laboratory characteristics in this series suggest a common etiology. Finally, these cases occurred in the context of a dearth of circulation of common respiratory viruses known to be associated with myocarditis, and thorough diagnostic evaluations did not identify infectious etiologies,” they added.*

## What is disease?

## ***Disease is nature's effort to free the system from toxins and impurities.***

*It is a sin to be sick; for all sickness is the result of transgression. Many are suffering in consequence of the transgression of their parents. They cannot be censured for their parents' sin; but it is nevertheless their duty to ascertain wherein their parents violated the laws of their being, which has entailed upon their offspring so miserable an inheritance; and wherein their parents' habits were wrong, they should change their course, and place themselves by correct habits in a better relation to health. {HR, August 1, 1866 par. 2}*

*Sin and disease bear to each other and the relationship of cause and effect. Sickness and premature death do not come without a cause. {Testimony Studies on Diet and Foods (1926) 197.7}*

This concept of disease as nature's way of working for our good is foreign to us and many are undeservedly affected from the result of others but all of us as individuals have a contributing part in the problem. When we think of the definition of disease, most can acknowledge that microbes work for or against us according to the environment in which they find themselves and this is a result of factors such as nutritional value of the food we choose, resting the system and efficient elimination, by which we see the body maintaining itself or we can assist the body's restoration from disease.

## **What can be done for Covid 19 victims?**

*"The sufferers in such cases can do for themselves that which others cannot do as well for them. They should commence to relieve nature of the load they have forced upon her. They should remove the cause. **Fast a short time, and give the stomach a chance for rest. Reduce the feverish state of the system by a careful and understanding application of water.** (Blood is directed to the affected area to increase the action of white blood cells in the affected area. In the case of covid- the lungs) **These efforts will help nature in her struggles to free the system of impurities.** But generally the persons who suffer pain become impatient. **They are not willing to use self denial, and suffer a little from hunger. Neither are they willing to wait the slow process of nature to build up the overtaxed energies of the system.** But they are determined to obtain relief at once, take powerful drugs, prescribed by physicians. **Nature was doing her work well, and would have triumphed, but while accomplishing her task, a foreign substance of poisonous nature was introduced. What a mistake! Abused nature has now two evils to war against instead of one. She leaves the work in which she was engaged, and resolutely takes hold to expel the intruder newly introduced into the***

**system.** *Nature feels this double draft upon her resources, and she becomes enfeebled. **Drugs never cure disease. They only change the form and location. Nature alone is the effectual restorer, and how much better could she perform her task if left alone to herself.** But this privilege is seldom allowed her. If crippled nature bears up under the load, and finally accomplishes in a great measure her double task, and the patient lives, the credit is given to the physician. But if nature fails in her effort to expel the poison from the system, and the patient dies, it is called a wonderful dispensation of Providence.” Ellen G. White, *Spiritual Gifts*, Washington, D.C., Review and Herald Publishing Assoc. Vol. 4, 1945, 133 & 134.*

**The fragrance of the pine, the cedar, the fir and the eucalyptus, those native species that dotted the continent as first discovered have therapeutic properties as does peppermint oil.**

Man has a natural built-in system to fight disease. The aches and pains are nature's warnings by which the body responds, increasing white blood cells to the affected area and is nature's efforts to expel poisons such as the running nose with flu, coughing from the lungs; the mucus material is nature's effort to expel poisons. Imagine if this was not built into our system and in diseases such as Charcot associated diseases, where the nervous system is destroyed and no longer signals a problem the body destroys itself. Fortunately, we are given the signal to act upon, unfortunately, most do not understand the basics to prevent deformities that can result. We are to aid nature in these efforts to clean the system rather than tax the system with disease.

When we get the body to elicit a response by using disease to activate the body's defences there are always risks. The system is weakened and a seed remains so that when the body's defences are down it can manifest itself. Chicken pox can lead to shingles or Bell's palsy.

On top of this, the number of inoculations in a life time is being rapidly increased.

## A better way of treatment

Where were the free-flowing air systems rather than air conditioning in hospitals, medical centres and nursing homes? The attention to increased cleanliness is commendable.

What attempt was made to increase blood flow to the lungs?

What means of inhalation was used to assist cleaning out the lungs?

How about intravenous or oral vitamin C?

How about other natural immune boosters? For example cayenne& ginger

Such rational practical methods are not considered but rather more risky operations without informed consent. Informed consent is something seriously lacking in medical practice.

The SDA health message established in 1863 is an integral part of its unique teachings concerning life and death and the nature of man. No other Christian denomination is based with health accompanying its founding messages.

*We shall see the medical missionary work broadening and deepening at every point of its progress, because of the inflowing of hundreds and thousands of streams, until the whole earth is covered as the waters cover the sea. {MM 317.3}*

*Every institution that bears the name of Seventh-day Adventist is to be to the world as was Joseph in Egypt, and as were Daniel and his fellows in Babylon. In the providence of God these men were taken captive, that they might carry to heathen nations the knowledge of the true God. They were to be representatives of God in our world. They were to make no compromise with the idolatrous nations with which they were brought in contact, but were to stand loyal to their faith, bearing as a special honor the name of worshipers of the God who created the heavens and the earth.--8T 153. {PM 42.2}*

Exodus 15:<sup>26</sup> And said, If thou wilt diligently hearken to the voice of the Lord thy God, and wilt do that which is right in his sight, and wilt give ear to his commandments, and keep all his statutes (that includes His health laws), I will put none of these diseases upon thee, which I have brought upon the Egyptians: for I am the Lord that healeth thee.

*"There is concern that the virus, which is now constantly mutating, could re-emerge in the coming months. Only God knows what the future holds."*

We have to fool the body into making the virus- it is no longer external to the cell but manufactured in the cell as part of the make up through RNA instructions.

The spike protein touching the platelets activate them allowing a clot to form. The body recognises the waste products from the virus placed at the lumen of the cell and attacks the cell. The genes injected through mRNA vaccines remain in the blood stream for ever. No one knows where the genes are going and how far reaching this shall be.

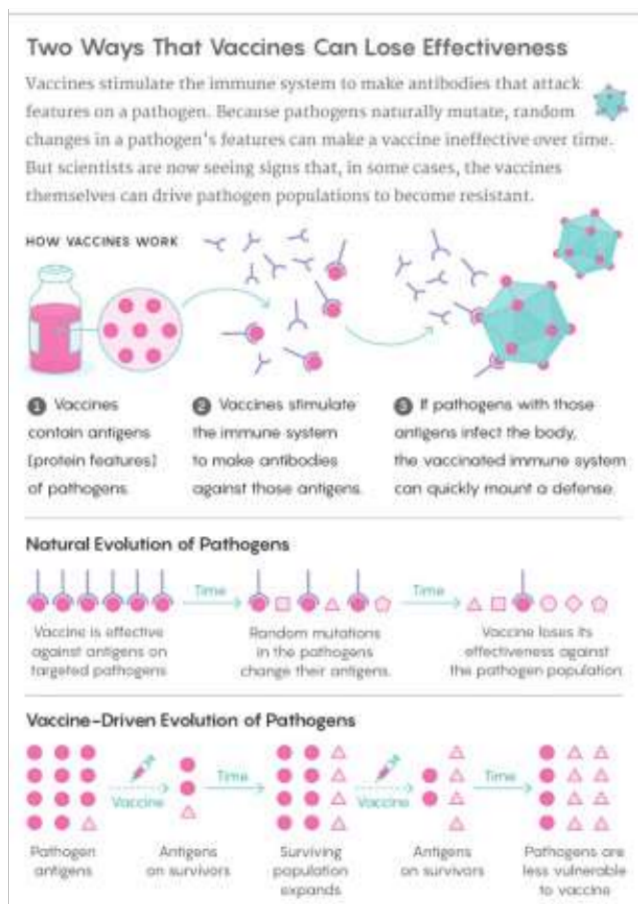

**Senator Ron Johnson:** *The American people deserve the truth. Really, the people of the world deserve the truth on this and unfortunately because of the cabal between social media, mainstream media, and our federal health agencies and big government, we're not getting the truth. The truth has been covered up for months whether we're talking about gain-of-function research, whether we're talking about the effectiveness of early treatment. I can't explain all of this Maria, all I know is something has gone off the rails here. I'm trying to look for answers. It just doesn't make sense to me... I just received this morning data out of Israel. That shows the population is about 84% vaccinated. But the new cases of*

**COVID in Israel are about 84% with vaccinated individuals. It certainly is lookinng like the Pfizer vaccine is not working with the Delta variant.**

## Vaccines drive the mutation of the pathogen.

*“Just as antibiotics breed resistance in bacteria, vaccines can incite changes that enable diseases to escape their control. Researchers are working to head off the evolution of new threats.*

In a 2014 paper published in *Emerging Infectious Diseases*, researchers in Australia, led by the medical microbiologist Ruiting Lan at the University of New South Wales, collected and sequenced *B. pertussis* samples from 320 patients between 2008 and 2012. The percentage of bacteria that did not express pertactin, a protein targeted by the acellular vaccine, leapt from 5 percent in 2008 to 78 percent in 2012, which suggests that selection pressure from the vaccine was enabling pertactin-free strains to become more common. In the U.S., nearly all circulating viruses lack pertactin, according to a 2017 CDC paper. “I think pretty much everyone agrees pertussis strain variation is shaped by vaccination,” Lan said.

Hepatitis B, a virus that causes liver damage, tells a similar story. The current vaccine, which principally targets a portion of the virus known as the hepatitis B surface antigen, was introduced in the U.S. in 1989. A year later, in a paper published in the *Lancet*, researchers described odd results from a vaccine trial in Italy. They had detected circulating hepatitis B viruses in 44 vaccinated subjects, but in some of them, the virus was missing part of that targeted antigen. Then, in a series of studies conducted in Taiwan, researchers sequenced the viruses that infected children who had tested positive for hepatitis B. They reported that the prevalence of these viral “escape mutants,” as they called them, that lacked the surface antigen had increased from 7.8 percent in 1984 to 23.1 percent in 1999.” Quanta magazine, immunology, Vaccines Are Pushing Pathogens to Evolve.

Melinda Wenner Moyer *May 10, 2018*

## **Follow the science: Bombshell: Nobel Prize Winner Reveals - Covid Vaccine is 'Creating Variants'**

“Prof. Luc Montagnier said that epidemiologists know but are “silent” about the phenomenon, known as “Antibody-Dependent Enhancement” (ADE).

While it is understood that viruses mutate, causing variants, French Virologist and Nobel Prize Winner Luc Montagnier contends that “it is the vaccination that is creating the variants.”

The 2008 Nobel Laureate made the explosive comments as part of a larger interview with Pierre Barnérias of Hold-Up Media earlier this month. The clip was exclusively translated for RAIR Foundation USA, and is quite damning for the agenda-driven left-wing establishment.

The prominent virologist explained that “there are antibodies, created by the vaccine,” forcing the virus to “find another solution” or die. This is where the variants are created. It is the variants that “are a production and result from the vaccination.”

### Summary

Despite over 140 million SARS-CoV-2 infections worldwide since the beginning of the pandemic, relatively few confirmed cases of SARS-CoV-2 reinfection have been reported. While immunity from SARS-CoV-2 infection is probable, at least in the short term, few studies have quantified the reinfection risk. To our knowledge, this is the first systematic review to synthesise the evidence on the risk of SARS-CoV-2 reinfection over time. A standardised protocol was employed, based on Cochrane methodology. Electronic databases and preprint servers were searched from 1 January 2020 to 19 February 2021. Eleven large cohort studies were identified that estimated the risk of SARS-CoV-2 reinfection over time, including three that enrolled healthcare workers and two that enrolled residents and staff of elderly care homes. Across studies, the total number of PCR-positive or antibody-positive participants at baseline was 615,777, and the maximum duration of follow-up was more than 10 months in three studies. Reinfection was an uncommon event (absolute rate 0%–1.1%), with no study reporting an increase in the risk of reinfection over time. Only one study estimated the population-level risk of reinfection based on whole genome sequencing in a subset of patients; the estimated risk was low (0.1% [95% CI: 0.08–0.11%]) with no evidence of waning immunity for up to 7 months following primary infection. These data suggest that naturally acquired SARS-CoV-2 immunity does not wane for at least 10 months post-infection. However, the applicability of these studies to new variants or to vaccine-induced immunity remains uncertain.

“Despite the high number of infections evidence shows that there is virtually no reinfection because of natural immunity. Eleven large cohort studies were identified that estimated the risk of SARS-CoV-2 reinfection over time, including three that enrolled healthcare workers and two that

enrolled elderly care home residents. All studies reported low relative SARS-CoV-2 reinfection rates in individuals with prior evidence of infection, compared with those O MURCHU ET AL. - 9 of 11 without, for up to 10 months. The relative risk of reinfection was low across studies, although there was some inconsistent evidence of a higher risk in older populations compared with younger populations. A limitation of this review was the uncertainty regarding the applicability of data to new variants of concern and to vaccinated populations.” Quantifying the risk of SARS-CoV-2 reinfection over time.

Despite this evidence of natural immunity being as effective, if not superior to the vaccine, the push is to vaccinate those who already have natural immunity citing the risk of the covid variant which is known to be highly infectious but less deadly. Less deadly though in a clean environment rather than say let loss in the poor of India. Natural immunity is superior when we compare vaccine risks as being deadly as cited by the FDA and CDC. Therefore, if a person chooses to boost their own natural immunity by the principals of internal hygiene this would be the most beneficial course of action rather than being subject to disease whether through the mRNA vaccines or the disease itself.

## Gene therapies where will it end?

Does it start and end with two jabs for covid or for one condition or will be used over and over again for various diseases and how about the ongoing push for GMOs.

As NSW has lifted the ban on Genetically modified foods (GMOs) in March 2021, it reminds us of an ever-growing cocktail of changes the body will have to cope with. Straight away GMOs and Monsanto, bring danger signs to many people's minds. We are told this is the way forward, reducing carbon emissions and feeding the world but people are concerned with the news Bill Gates is buying a third of US farm lands and prompting meatless substitutes and is a leading share holder in Monsanto.

The ideas of some of the medical profession is that promoting and enhancing vaccination strategies helps to reduce virally induced cancers and pesticides is not the problem in GMOs. But when we get away from nature's laws for agriculture and human health, we have problems. **'Glyphosate residue could reach humans and animals through feed and excreted in urine. Presence of glyphosate in urine and its accumulation in animal tissues is alarming even at low concentrations.'**

### Abstract

In the present study glyphosate residues were tested in urine and different organs of dairy cows as well as in urine of hares, rabbits and humans using ELISA and Gas Chromatography-Mass Spectroscopy (GC-MS). The correlation coefficients between ELISA and GC-MS were 0.96, 0.87, 0.97 and 0.96 for cattle, human, and rabbit urine and organs, respectively. The recovery rate of glyphosate in spiked meat using ELISA was 91%. Glyphosate excretion in German dairy cows was significantly lower than Danish cows. Cows kept in genetically modified free area had significantly lower glyphosate concentrations in urine than conventional husbandry cows. Also glyphosate was detected in different organs of slaughtered cows as intestine, liver, muscles, spleen and kidney. Fattening rabbits showed significantly higher glyphosate residues in urine than hares. Moreover, glyphosate was significantly higher in urine of humans with conventional feeding. Furthermore, chronically ill humans showed significantly higher glyphosate residues in urine than healthy population. The presence of glyphosate residues in both humans and animals could haul the entire population towards numerous health hazards, studying the impact of glyphosate residues on health is warranted and the global regulations for the use of glyphosate may have to be re-evaluated.

the safety of this herbicide. Firstly, long-term toxicology of the low glyphosate residues has not been investigated in vertebrates. Secondly although EPSPS is absent, glyphosate has been reported to inhibit other

Reality is that the common man can know that chemical toxicity travels up the food chain and is enhanced by so doing which results in cancer- cause to the effect.

# Complete Genes May Pass from Food to Human Blood.

Our bloodstream is considered to be an environment well separated from the outside world and the digestive tract. According to the standard paradigm large macromolecules consumed with food cannot pass directly to the circulatory system. During digestion proteins and DNA are thought to be degraded into small constituents, amino acids and nucleic acids, respectively, and then absorbed by a complex active process and distributed to various parts of the body through the circulation system. Here, based on the analysis of over 1000 human samples

from four independent studies, we report evidence that meal-derived DNA fragments which are large enough to carry complete genes can avoid degradation and through an unknown mechanism enter

the human circulation system. In one of the blood samples the relative concentration of plant DNA is higher than the human DNA. The plant DNA concentration shows a surprisingly precise log-normal distribution in the plasma samples while non-plasma (cord blood) control sample was found to be free of plant DNA.'

## Back to basics or an overview of understanding disease

Let's keep in mind the very basic definition of disease. Microbes change or morph themselves according to the environment in which they find themselves. Extracellular vessels, EVs or viruses will find their target to help or hinder human development depending on the environment they find themselves. Every disease lays a dormant seed in the system's DNA and may overwhelm the immune system when immunity is low and this is affected by age, stress, the mind, the nutritional state of the person and their cleanliness. Eliciting an immune response to a vaccination on top of catching another wild strain of disease could overwhelm the system. Others have said this in another way, that there is the danger of 'enhanced immune response'.

What was found in animal trials? It was this very concern. The test animal exhibited antibodies but ... 'These SARS-CoV vaccines all induced antibody and protection against infection with SARS-CoV. However, challenge of mice given any of the vaccines led to occurrence of Th2-type immunopathology suggesting hypersensitivity to SARS-CoV components was induced. Caution in proceeding to application of a SARS-CoV vaccine in humans is indicated.' **Immunization with SARS Coronavirus Vaccines Leads to Pulmonary Immunopathology on Challenge with the SARS Virus.**

After research for 19 years in mRNA vaccines, the same results occurred producing antibodies and later killing all the test subjects. Yet despite this they found an mRNA vaccine that is "safe and effective" in nine months! It is impossible to determine safety in nine months.

The tendency of coronavirus vaccines to harm the patient isn't new... it is a well-known problem, and has been for years.

The body works by laws of nutrition, elimination and cleanliness and these are the real defences to pathogens that are only opportunistic in a compromised system. This is the true understanding of 'homeostasis.'

Man was made of the dust or the minerals of the earth and as he continues to become nutrient rich from continuing to absorb earth's minerals as close to their natural state as possible, he rebuilds thus replenishing himself. mRNA vaccination and GMO foods could have radical results for the world that will emerge as many new diseases over time. Thus, there is a line of disease and profit created.

Jesus tells in Matthew 10:8 **Heal the sick, cleanse the lepers, raise the dead, cast out devils: freely ye have received, freely give.**

## 2020 turning point

**"The principles of health reform** have been proclaimed by us as a people for thirty years. And yet there are among us ministers of the gospel and members of the church who have no respect for the light that God has given upon health reform. They eat as they please, and work as they please. God calls for a straight testimony to be given to those who claim to believe that we are living in the last days of this earth's history. A line of distinction must be drawn between those who serve God, and those who serve him not. God calls upon his people to put away self-pleasing. When in body, soul, and spirit they will dedicate themselves to God, his power will be revealed in a remarkable manner."

In March 2020 a surprise to me and many was the lockdowns worldwide. We were looking in the opposite direction. Previously we had heard of swine flu and the media was giving this traction but it was of no major consequence but signalled things to come. I remember also listening to the radio in March 2020 while in the car on a long trip and saying to myself how many times are they going to mention coronavirus? I began to count the repetition in a short space of time until I decided I had had enough and switched the radio off. But I would be forced back to examine these things because

as we all know it never went away, and at that time I said to myself something is not right here, there's something 'fishy' going on.

Here is a wake-up call. Here is a time to consider **National Sunday Law** is around the corner. A preparatory time though late in the day. A set of circumstances in which the landscape is made ready for the world-wide work of the true gospel.

There is a two-pronged attack to establish world government through covid and climate change and coming on top of this mass propaganda, communication hacks and AI. There was a work for confederation always there but is no longer under the covers and now we clearly see it strongly positioned and coming into force. In some degree the office of President Trump helped to expose the agenda more fully despite being heavily influenced by these same forces. And for God's people years of potential have been squandered. Businesses outside the cities and places for employment for young people could have been ready for the crisis. Where are the restaurants, cafes, healing centres that should have been established everywhere with opportunities for people to get out of the cities and into the country? Health centres that would be a beacon to the world should have been mainstream SDAism. Young people ready and educated in the gospel and health has materialised, but not as a whole, but rather is a fragmented mess. The warning was given: **God's people should be preparing for what is to break upon the world as an overwhelming surprise.** Now consider how much time you have to do this in? Time is exceedingly short.

The gospel of health is the only work that will be allowed to proceed during the forth coming events that are the end of the world. This should have been studied and realised by our people. SDA were called to stand in the breach. Now we can look back and see clearly why the health message was given. The worry is that much of the gospel is not understood and the majority of SDAs are unintelligent on health matters.

So here was a point of time that was opportunistic for God's people- a worldwide event, but as a people we have been slow to make personal changes and influenced by the world in our approach to disease. How many times have I heard people say they did want to do this or that, concerning the health message? Yes, it was a bore for them or the progress was future and presently non-existent. It was about personal taste rather than what does God want. We were not prepared for the crisis found in Daniel 1. This has not changed since 1901.

*"The principles of health reform have been proclaimed by us as a people for thirty years. And yet there are among us ministers of the gospel and members of the church who have no respect for the light that God has given upon health reform. They eat as they please, and work as they please. God calls for a straight testimony to be given to those who claim to believe that we are living in the last days of this earth's history. A line of distinction must be drawn between those who serve God, and those who serve him not. God calls upon his people to put away self-pleasing. When in body, soul, and spirit they will dedicate themselves to God, his power will be revealed in a remarkable manner. After Christ's baptism he preached the gospel to the cities that were round about. He was working and healing—the medical missionary work was bound up with the preaching of the gospel. I am so thankful for the medical missionary work, carried in gospel lines. It is to be taught, it is to be carried forward; for it is the very work that Christ did when on this earth. He was the greatest missionary the world ever saw.*

You may say: “Why not, then, take hold of the work, and heal the sick as Christ did?”—I answer, You are not ready. Some have believed; some have been healed; but there are many who make themselves sick by intemperate eating or by indulging in other wrong habits. When they get sick, shall we pray for them to be raised up, that they may carry on the very same work again? **There must be a reformation throughout our ranks; the people must reach a higher standard before we can expect the power of God to be manifested in a marked manner for the healing of the sick.** *We talk of the Holy Ghost; we preach of the Holy Ghost; but we need to understand better what the office of the Holy Ghost is.* **We need to understand that we must co-operate with God in every sense or God can not co-operate with us. ‘We are laborers together with God.’”**

Now the test has come. We are in a crisis, one for which we need to use our God given intelligence. At this time further division may be seen on health message which has been confused with the world.

*We have far more to fear from within than from without. The hindrances to strength and success are far greater from the church itself than from the world. 1SM 122 (1887). {LDE 156.2}*

Are we as a people asleep? The responses to this event remind me of the Tsunamis in Japan where some people were out run from the flooding water while others stood frozen and watched while the waters come upon them despite people calling out the danger warning. Many are standing back and will not comment.

The future may seem surreal but it is here. Have we and should we have a life saving message for the world? Do people’s lives and salvation hang on the decisions that we make now? How are the gospel and the true health message tied together? God requires perfection and we must do all in our power but rely on God and pray to Him as believing that it is all in His power- to rephrase the words of the prophet. It is a cooperation of God and man, as a strong father with a weak child. In healing moderation only in all good things reverses blood vessel disease, not otherwise. Healing is also a cooperative work as found in the gospel. Hygienically clean inside is God’s way, not a moderation of good and bad as is the way of the world. This reflects also the state of the mind that we are to have through the work of the gospel – a state of mental hygiene and being hygienically clean inside contributes to our sanctification- a complete circle, making a person whole. This is the true estimate of being a man or a woman in the sight of heaven.

As we reference back to the 1901 SDA General conference comments by E.G White- an unloving heart was primarily the fault found in our people. The work actuated by God will be a driving force through His love. Is this not a time to awake as foolish virgins that sleep? But that awakening is to tempered with love and a balance mind and a rational message.

## What of the future?

Many are taking the events of Covid as a decision time- A Daniel 1 moment. Is this moment shaping our prophetic future? This situation is not new. Forced vaccination has occurred before but there has never been a worldwide vaccination program. Is this in fact a call for God’s people to meet the

physical and spiritual needs of the world? How far are we from National Sunday Laws with such an advent?

The stage has been set for God's people. The gospel work has been disrupted and will continue to do so as people are censored. God is making in His providence circumstances such that those who want to take up the true ministry of Jesus can by bringing physical and spiritual healing as the soon coming circumstances arise.

As Daniel and his friend were sent in God's providence to Babylon so will God's people be scattered throughout the world to spread the gospel that Satan had thought to muzzle. At this time the true gospel work as carried out by the Saviour is yet to be realised. Less sermonising and a more practical application and wholistic message is needed in following Jesus' example.

*As religious aggression subverts the liberties of our nation, those who would stand for freedom of conscience will be placed in unfavorable positions. **For their own sake they should, while they have opportunity, become intelligent in regard to disease, its causes, prevention, and cure. And those who do this will find a field of labor anywhere.** There will be suffering ones, plenty of them, who will need help, not only among those of our own faith, but largely among those who know not the truth. The shortness of time demands an energy that has not been aroused among those who claim to believe the present truth. — --CH 506 (1892). {LDE 80.2}*

*I wish to tell you that soon there will be no work done in ministerial lines but medical missionary work.--CH 533 (1901). {LDE 80.3}*
