

The Inconvenient Truth of Weather Modification

PART 2 of 2

One of the most important areas of modern history for the general public to understand are the advancements in weather modification and its use in the climatic changes seen today. 'There will be a universal bond of union, one great harmony, a confederacy of Satan's forces as He desires to embrace the whole world in his confederacy.'

1992 former US president GEORGE BUSH Sr. said "Effective execution of Agenda 21 will require profound re-orientation of human society, unlike anything the world has ever experienced. A major shift in the priorities of both governments and the individuals, in an unprecedented re-deployment of human and financial resources. This shift will demand that a concern for the environmental consequences of every human action will be integrated into individual and collective decision making at every level."

1992 MAURICE STRONG creates the Earth Council Institute. Secretary General of the UN Earth Summit and member of the Club of Rome. With the assistance of amongst other elites Mikhail Gorbachev and David Rockefeller this leads to the **Earth Carter with its outline for international sustainable development.** He told the Rio earth summit: "It is clear the current lifestyles and consumption patterns of the affluent middle class involving **high meat intake, consumption of large amounts of frozen convenience foods, use of fossil fuels, ownership of motor vehicles, small electrical appliances, home and workplace air-conditioning and suburban HOUSING are NOT SUSTAINABLE.**"

Under the leadership of Satan there are men who today are doing all in their power to plunge the world into commercial strife. Thus Satan is trying to bring about a condition of things that will make the world uncivilized. He desires to see strange things acted out, which God, who is too wise to err, has not ordained. –Letter 114, Oct. 27, published 1910, to Elder A. G. Daniells, president of the General Conference. {Ellen G White This Day with God p309.6}

**1993 Vatican Advanced
Technology Telescope Located
in The University of Arizona
with 3 telescopes run by the
Jesuits and linked with the
University of Arizona. In 1992
University of Arizona stated:
Arizona's interest in weather**

modification evolved over time, from early cloud seeding experimentation to the adoption of sophisticated computer modelling techniques that simulate climatological phenomenon and test weather modification premises. This is important to note in relation to the Paris Agreement. The Pope is well aware of weather modification experimentation.

*BABYLON: Rome in prophecy is recognised as spiritual Babylon whose meaning is **gate of the gods***

1993 HARRP antenna system to control the Ionosphere (High Frequency Active Auroral Research Program) Alaska Fairbanks

'HAARP was developed as part of an Anglo-American partnership between Raytheon Corporation, which owns the HAARP patents, the US Air Force and British Aerospace Systems (BAES).' Its purpose was for surveillance, communications and navigation, in conjunction with the University of Alaska Fairbanks, the first university owned rocket range in the world to

study the aurora, established in 1917.' HARRP is 'high frequency (HF) transmitter for study of the ionosphere with crossed-dipole antennas spread across 33 acres and capable of radiating 3.6 megawatts into the upper atmosphere and ionosphere at a cost of \$290 million. This facility gained a lot of attention but there are many similar installations around the world in places you wouldn't even suspect. **'The High-frequency Active Auroral Research Program (HAARP) was initiated as an ionospheric research program jointly funded by the U.S. Air Force, the U.S. Navy, the University of Alaska Fairbanks, and the Defense Advanced Research Projects Agency (DARPA).'**

Related facilities: (the HIPAS, near Fairbanks, Alaska, was dismantled in 2009, and the Arecibo Observatory in Puerto Rico, collapsed in 2020.)

HISCAT (International Radio Observatory, Sweden) (350 MW)

HAARP Gakona Alaska (110 MW)

EISCAT (Tromsø, Norway) (48 MW)

VOA (Voice of America - Delano, CA) (27 MW)

SURA (Radiophysical Research Institute, Nizhny Novgorod, Russia) (20 MW)

Arecibo (National Astronomy and Ionosphere Center, Puerto Rico) (20 MW)

HIPAS High Power Auroral Stimulation Observatory (UCLA Plasma Physics Lab - Fairbanks Alaska) (17 MW)

1994 Milstar began and stands for Military Strategic and Tactical Relay- a series of air force satellites that have superior capabilities

1994 Mount Pinatubo volcano eruption in the Philippines scientists note its cooling effect on the planet. This has led to the idea of cloud brightening.

1994 Project Blue Beam: Serge Monast Canadian journalist developed the theory in 1994, published in his book Project Blue Beam; NSA and United Nations are planning to bring the world under their control by simulating the return of Christ. This theory is so close to the truth, yet not true. Consider the Lucis (Lucifer) trust as part of the United Nations and the Jesuits peering through the Lucifer telescope in Arizona. They are all expectant of the return of their 'Christ,' Lucifer. It becomes apparent when you look at leaders such as Alice Bailey's own writings and the occultist Alice Bailey and Madam Helena Blavatsky that venerate Lucifer or Satan.

1995 Zbigniew Brzezinski states: 'We cannot leap into world government through one quick step.... **The precondition for eventual and genuine globalization is progressive regionalization** because by that we move toward larger, more stable, more cooperative units.'

1996 Research Paper presented to Air Force Weather as a Force Multiplier: Owning the Weather in 2025 The universities are an integral part of the military and US government funding is sent to the universities to supply the military and industry with ground breaking material on weapons development. 'It could have offensive and defensive applications and even be used for deterrence purposes. The ability to generate precipitation, fog and storms on earth or to modify space weather... and the production of artificial weather all are a part of an integrated set of [military] technologies.' <https://prophecyrevelations.com/wp-content/uploads/2013/11/Owning-the-weather.pdf>

1996 Air Force 2025 states in 2025 a Global Surveillance, Reconnaissance, and Targeting System could be used by an **unmanned combat aerial vehicle**. 'A Spacebased High-Energy Laser System is seen as a multimegawatt chemical laser that can zap ground, air, or space targets. At lower power settings, it could disable enemy optics, perform passive sensing missions, actively illuminate a target with a laser, or even modify the weather. Between

fifteen and twenty such satellites could provide global coverage. A Solar-Powered High-Energy Laser System would perform much the same function but derive its power from the sun rather than an on-board power source.' **Air Force Magazine** **Air Force** **2025** By John A. Tirpak Dec. 1, 1996 <https://www.airforcemag.com/article/1296study/>

1997 Kyoto Protocol: brings to the climate change table the specific commitments that were missing in the Rio climate change convention. The goal of the Kyoto Protocol is the reduction of emissions by at least 5 percent below the 1990 emission levels for the commitment period between 2008 and 2012. <https://law-in-action.com/environmental-policy-and-law/climate-change/>

1997 NASA takes up the quest again for satellite solar-power system (SSPS)

1997 US secretary of defense on the CIA

website William Cohern: At a conference on terrorism, weapons of mass destruction and U.S. strategy Cohern said the enemy can cause

earthquakes, volcanic eruptions, and climate alterations using electromagnetic waves at a distance. "It's real, and that's the reason why we have to intensify our efforts." In other words, we need to be involved and be ahead of the game.

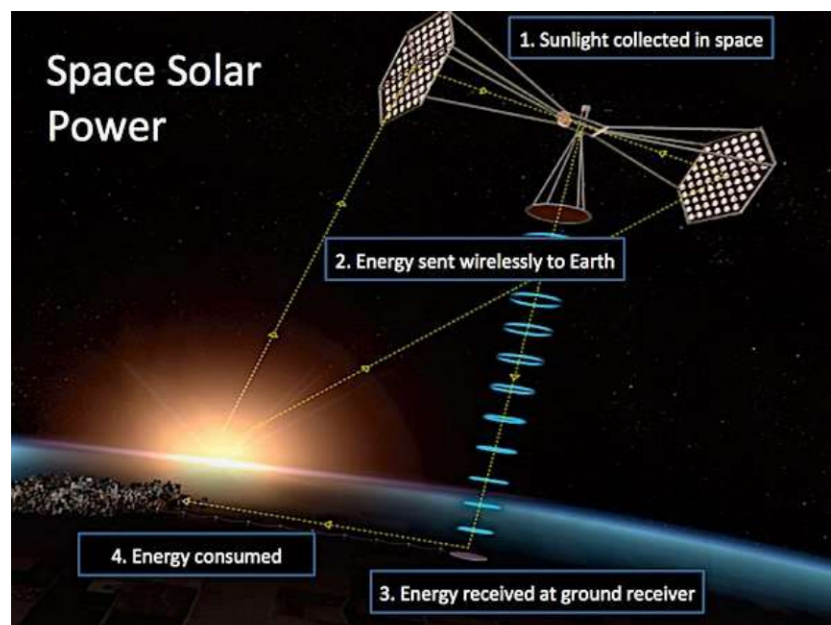

1997, US Space Command published its Vision for 2020, which forecast that space power would evolve into a *"medium of warfare"* during *"the early portion of the 21st century"*. As a result, Washington being able to *"control"* and ***"dominate" space in order to "deny other nations access"***, was considered a top priority. In the intervening years, China and Russia repeatedly presented draft treaties to the United Nations calling for a ban on the deployment of conventional weapons in space, and a prohibition on the use of force in and from space, and threats of use of force against spacecraft. Despite being supported by an

overwhelming number of UN member states, the pair's proposals were consistently rebuffed by Washington.

[Battle for the galaxy: New paper reveals how UK is making extensive plans for war in space](#)
25 Mar, 2021 *Kit Klarenberg*

1997 US Test Fire ground laser at aging satellite "Shooting a satellite is shooting ourselves in the foot," said John Pike, the director of space policy for the Federation of American Scientists. Obviously, the line between weapon modification and weapons has always been blurred.

In 1999, NASA's Space Solar Power Exploratory Research and Technology program (SERT) is relaunched.

Just imagine controlling the electrical grid from space on earth as the only clean renewable energy source. Imagine the potential for weapons

using laser or microwave or the potential for climatic disruptions that nobody can hold you accountable for. Imagine the current unseen effects as countries of the world are throwing around microwave, laser and doppler.

1999 X-37b orbital test vehicle started with NASA transfer to US military 2004. The unmanned robotic vehicle is launched from a rocket and is reusable.

2003 The Thunderstorm Solar Power Satellite (TSPS) is a concept for also applying microwave power beamed from solar power satellites to heat a sensitive region of a mesocyclone and eliminate the "hook echo" that is associated with the formation of

tornadoes. The hypothesis is that destabilization of the sensitive region of the storm that leads to a tornado.

2004 HAARP 'researchers created a modest neon light show visible from the ground...

The aurora occurs when electrons from a cloud of hot gas, known as plasma, rain down from space and excite molecules in the ionosphere, about 50 kilometres.' **The significance is nations are playing with the ionosphere for superior war capabilities.**

First Artificial Neon Sky Show Created By Robert Roy Britt published February 03, 2005

<https://www.livescience.com/124-artificial-neon-sky-show-created.html>

2006 News QLD Australia \$7.6 million to a four-year cloud seeding trial: 'Queensland Premier Peter Beattie said he was honouring an election promise by allocating \$7.6 million to a four-year cloud seeding trial in the state's booming south-east corner... Natural Resources and Water Minister Craig Wallace said the trial would suit Queensland's warm temperature, differing from cloud seeding techniques currently used in southern parts of Australia to enhance water supplies for hydro-electric power generation.

"We believe that we can trap the clouds coming in from over the Darling Downs and western Queensland - trap those coming in and get the planes up in there to seed the clouds to see if we can increase the rainfall," Mr Wallace said.' Sydney Morning Herald

Note the position of the Darling Downs 80km off Brisbane, Gold Coast and Northern NSW with towns like Lismore and refer to Project Cumulus. Consider the recent flood over the last two years in this area and the call for action on climate change.

2006 An Inconvenient Truth released; documentary film directed by Davis

Guggenheim about former United States Vice President Al Gore's on global warming.

The inconvenient truth fails to report weather modification as part of climatic change taking place on a never before global scale; this is The Inconvenient Truth!

When I first saw the movie the 'Inconvenient truth' I thought of the words of prophecy fulfilled in Revelation 11: 18 And the nations were angry, and thy wrath is come, and the time of the dead, that they should be judged, and that thou shouldest give reward unto thy servants the prophets, and to the saints, and them that fear thy name, small and great; and **shouldest destroy them which destroy the earth. I soon found out that the problem was a lot deeper than what was being conveyed and had an important and inconvenient truth attached to it.**

2006 Sea-Based X-Band Radar (SBX) is a floating, self-propelled, mobile radar station.

Consider the NEXRAD Radar and this radar for ballistic missiles. NEXRAD are small but a large network of weather radars. 'The radar has been described by Lt. Gen Trey Obering (director of MDA) as being able to track an object the size of a baseball over San Francisco in California from the Chesapeake Bay in Virginia, approximately 2,900 miles (4,700 km) away.'

Above Greenland installation with US personnel and the SBX which can be relocated anywhere in the world. These are radars for tracking intercontinental ballistic missiles.

2007, EAA found cloud seeding could reduce rainfall; 'the EAA (*Edwards Aquifer Authority board of Texas*) approved cloud seeding efforts for the ninth year in a row, and for the first time the program included a method to statistically evaluate the project's effectiveness. Four Board members voted against continuing the program, saying there was evidence that cloud seeding could actually **decrease rainfall by accident**' Gregg Eckhardt environmental scientist

<https://www.edwardsaquifer.net/index.html>

2007 News: fundraising for mysterious weather modification program in Australia: Then

Environment Minister [Malcolm](#)

[Turnbull](#) and later Prime Minister

said "The Australian Government is open to new and innovative approaches to secure water." \$10

million was placed 'in the

investigation of an untried Russian technology that aims to trigger rainfall from the atmosphere, even when there are no clouds. The Rain Corporation presented research documents written in Russian, explained by a Russian researcher who spoke to local experts in Russian.'

'Malcolm Turnbull's fundraising group the Wentworth Forum, includes a long list of generous donors including Frank Lowy, Ros Packer, John Simons, and Matt Handbury, chairman and part-owner of the so-called Australian Rain Corporation, beneficiary of the Minister's funding. Mr Handbury is the wealthy nephew of Rupert Murdoch.' So was likely a cloud ionizing system but that remains unconfirmed.

2007 Australian Rain Technologies (ART) a subsidiary of weathertec enhanced rainfalls near Brisbane for the Australian Government. [This was achieved by charging aerosols in the atmosphere with Emitter Stations on the ground.](#) 'The enhanced rainfalls covered a catchment area of 7'400 km². **This rainfall amount is equivalent to several years water supply from Wivenhoe river,** demonstrating the large potential benefits of enhancing rainfall by the technology.' <https://weathertec-services.com/case.html>

2007 Nobel Peace Prize was awarded jointly to **Albert (Al) Gore Jr** and the **Intergovernmental Panel on Climate Change (IPCC)**, "for their efforts to build up and disseminate greater knowledge about man-made climate change, and to lay the foundations for the measures that are needed to counteract such change". The inconvenient truth never really mentioned.

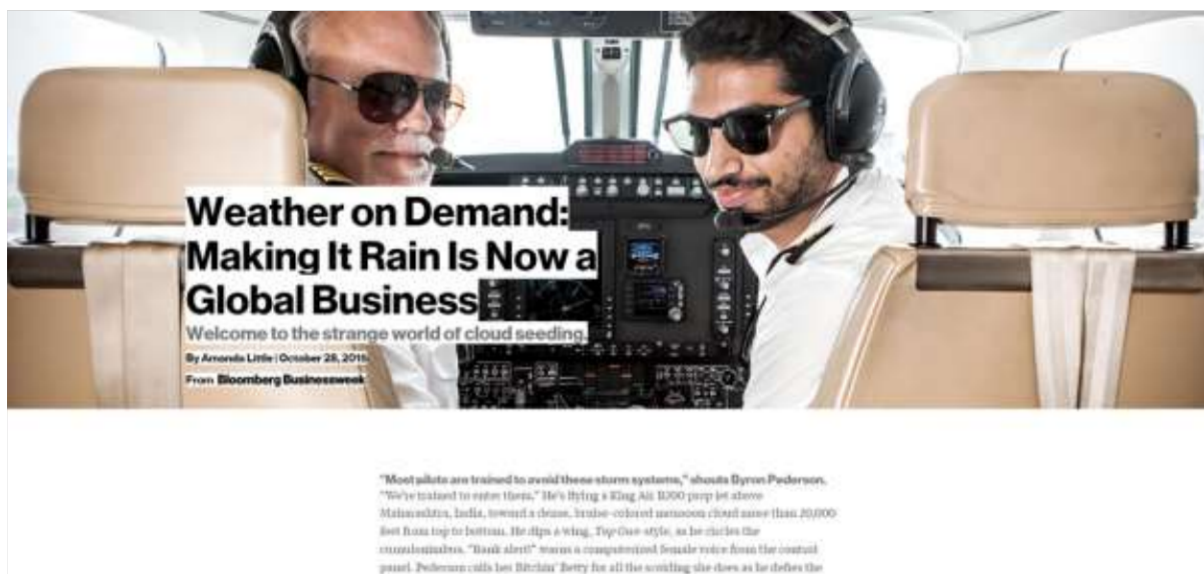

2008 Beijing Olympics: 'Beijing's Weather Modification Office will track the region's weather via **satellites, planes, radar, and an IBM p575 supercomputer**. It models an area of 44,000 square kilometers (17,000 square miles) accurately enough to generate hourly forecasts for each kilometer. Then, using their two aircraft and an array of twenty artillery and rocket-launch sites around Beijing, **the city's weather engineers will shoot and spray silver iodide and dry ice into incoming clouds that are still far enough away that their rain can be flushed out before they reach the stadium.**

Finally, any **rain-heavy clouds that near the Bird's Nest will be seeded with chemicals to shrink droplets so that rain won't fall until those clouds have passed over.** Zhang Qian, head of Beijing's Weather Modification Office, explains, "**We use a**

coolant made from liquid nitrogen to increase the number of droplets while decreasing their average size. As a result, the smaller droplets are less likely to fall, and precipitation can be reduced.” August is part of Northeast Asia’s rainy season; chances of precipitation over Beijing on any day that month will approach 50 percent. Still, **while tests with clouds bearing heavy rain loads haven’t always been successful, Qian claims that “the results with light rain have been satisfactory.”** [Weather engineering in China by Mark Williams Pontin March 25, 2008](https://www.technologyreview.com/2008/03/25/270084/weather-engineering-in-china/) <https://www.technologyreview.com/2008/03/25/270084/weather-engineering-in-china/>

‘Only a few of China’s rainmakers use planes. More commonly, they fire silver iodide into the sky from artillery pieces. But that can be dangerous, too. Locals are often advised to keep an eye out for unexploded shells, which occasionally land on people’s homes....’

23 private companies around the world are weather modification companies for private business and governments.

2008 Bundaberg Australian Rain Technologies (ART) a subsidiary of weathertec enhanced rain for agriculture, forestry, and refilling of the Paradise Dam. The project was observed by University of Queensland and measured by University of Wollongong.

(Australian Rain Corporation have carried out experiments in Oman from 2013 - 2018 and Mount Lofty Ranges South Australia)

<https://weathertec-services.com/case.html>

Early 2008 floods: towns seriously affected by the floods include Townsville, Bundaberg, Mackay, Rockhampton, Airlie Beach, Proserpine, Cooktown, Cairns and Ingham. Heavy rainfall and subsequent flooding resulted in widespread damage ...

2008/09 Cloud Seeding Research Program (QCSRP) In response to extreme water shortages in southeast Queensland, Australia, brought about by reduced rainfall and increasing population, the Queensland government decided to explore the potential for cloud seeding to enhance rainfall. The Queensland Cloud Seeding Research Program (QCSRP) was conducted in the southeast Queensland region near Brisbane during the 2008/09 wet seasons. What is interesting is that a former air force personnel spoke of spotting planes that were not at normal altitudes creating chem trails in the Darling Down around this time. 80km from Gold Coast, Brisbane and Lismore would have a potential to cause weather changes in these key areas given the right environment. This the sight of heavy flooding in recent years.

2008 : Laser Triggers Electrical Activity In Thunderstorm: French scientists led by André Mysyrowicz deliberately triggered electrical activity at the top of South Baldy Peak in **New Mexico** during two passing thunderstorms. The group found that its laser filaments increased electrical activity in storm clouds, but did not trigger lightning but was successful in 2012. [Artificial Lightning: Laser Triggers Electrical Activity In Thunderstorm For The First Time](https://www.sciencedaily.com/releases/2008/04/080414082517.htm) April 14, 2008 :Optical Society of America

Researchers have developed a new technique to cause rain and lightning by firing a laser at clouds.

The technique uses a 'double laser' to stimulate particles within a cloud.

The technique could one day be used to create rainstorms and even lightning on command, the researchers hope.

Lightning storms over Africa: The new technique would allow researchers to trigger rain and

Double laser to start to
create storms and
lightening

2012 Stennis Space Centre NASA tests for liquid oxygen/liquid hydrogen rocket engine.

NASA rocket engines run on liquid oxygen and liquid hydrogen propellants, combining and combusting in an engine, that make large clouds of steam that exceed 6,000 degrees

Fahrenheit. This has the ability to make it rain immediately as shown in the video from top-gear. https://www.youtube.com/watch?v=qw1vm_wdpy0

Chinese Journal of Aeronautics Volume 27, Issue 4, August 2014, Pages 805-811

2015 Alaska university takes over the HAARP US military project. All sorts of reports and conspiracies have been made concerning HARRP such as causing earthquakes, changing the weather and exploration for minerals. In fact, such takes away from what is really currently going on in weather warfare. There is no doubt that this installation is for military purposes with weapons in mind and that it can cause changes to the ionosphere but the technology is rapidly moving on. **A lot of what was happening in weather warfare is in space rather than what can be seen on the ground. The work is in microwave and laser solar powered satellite development.**

"For over 25 years, the Air Force Research Laboratory (AFRL) Space Vehicles Directorate at Kirtland Air Force Base, New Mexico, and the University of Alaska Fairbanks (UAF) have collaborated on ionospheric research at HAARP. When USAF funding for research and development decreased, efforts were made to find a solution to preserve this one-of-a-kind national research resource."

2015 The UAE (United Arab Emirates) used lasers on drones to target clouds with \$15 million on 9 'rain enhancement projects' five years. Initially using cloud seeding but then lasers to forcibly pool water droplets in the air, thus triggering desired rainfall.

2015 January Pope said that people were "mostly" responsible for recent warming and that they have "slapped nature in the face."

Obviously, this is not true and it is not as if he is unfamiliar with war and scientific developments.

Thus the false science of the present day, which undermines faith in the Bible, will prove as successful in preparing the way for the acceptance of the papacy, with its pleasing forms, as did the withholding of knowledge in opening the way for its aggrandizement in the Dark Ages. {Great Controversy p572.3 published in 1888}

2015 April 28, scientists, religious figures and policymakers will gather at the Vatican to discuss the science of global warming

Nature Magazine, Vatican convenes major climate-change meeting Edwin Cartlidge <https://www.nature.com/articles/520596a>

2015 May Encyclical Letter Laudato si' or Care for Our Common Home is the new appeal from Pope Francis addressed to "every person living on this planet" and for world leaders and churches to act on climate change with the intent to abandon nationalism, consumerism or capitalism and individual ownership and freedoms for the greater good.

Here is the aim to bring the world to Sunday keeping, as the rest day thus giving power back to the Papacy it had in the dark ages by observing the day it inaugurated. Here lies the secret of its power when its dogmas are infused in the state.

“On Sunday, our participation in the Eucharist has special importance. Sunday, like the Jewish Sabbath, is meant to be a day which heals our relationships with God, with ourselves, with others and with the world. Sunday is the day of the Resurrection, the “first day” of the new creation, whose first fruits are the Lord’s risen humanity, the pledge of the final transfiguration of all created reality. It also proclaims “man’s eternal rest in God”.¹⁶⁸ In this way, Christian spirituality incorporates the value of relaxation and festivity. We tend to demean contemplative rest as something unproductive and unnecessary, but this is to do away with the very thing which is most important about work: its meaning. We are called to include in our work a dimension of receptivity and gratuity, which is quite different from mere inactivity. Rather, it is another way of working, which forms part of our very essence. It protects human action from becoming empty activism; it also prevents that unfettered greed and sense of isolation which make us seek personal gain to the detriment of all else. The law of weekly rest forbade work on the seventh day, “so that your ox and your donkey may have rest, and the son of your maidservant, and the stranger, may be refreshed” (Ex 23:12). Rest opens our eyes to the larger picture and gives us renewed sensitivity to the rights of others. And so the day of rest, centred on the Eucharist, sheds light on the whole week, and motivates us to greater concern for nature and the poor.”

2015 August 2015 historical address to US congress in other words to the US law makers.

Without the USA involved in climate change the United Nations and the Vatican has little power to achieve its goals. The Pope quoted liberally from his recent encyclical that called for action on climate change, specifically saying that Congress and the United States have a role to play

in implementing "a culture of care" and "an integrated approach to combating poverty, restoring dignity to the excluded, and at the same time protecting nature." [CBS News](#)

2016 Nevada using drones for cloud seeding. Drone engineers together with scientists from the Desert Research Institute, Drone America, and AviSight have teamed up to build the drone, which carries cloud-seeding equipment... Engineers and meteorologists say they have created the first autonomous cloud seeding platform that could increase rainfall by 15 per cent.' <https://www.dailymail.co.uk/sciencetech/article-3516090/The-drone-control-weather-Cloud-seeding-UAV-tested-California-hoped-increase-rainfall-15.html>

Drone weather manipulation or lasers from the ground or space can be used without anyone to question these activities. Military and police personnel follow orders usually without question particularly the higher the rank they hold.

If that wasn't enough lets cloud seed the stratosphere!

2016 stratosphere cloud seeding. CIA Director Brennan Speaks at the Council on Foreign Relations

‘Another example is the array of technologies—often referred to collectively as geoengineering—that potentially could help reverse the warming effects of global climate change. One that has gained my personal attention is **stratospheric aerosol injection, or SAI, a method of seeding the stratosphere with particles that can help reflect the sun's heat, in much the same way that volcanic eruptions do.** An SAI program could limit global

temperature increases, reducing some risks associated with higher temperatures and providing the world economy additional time to transition from fossil fuels. The process is also relatively inexpensive—the National Research Council estimates that a fully deployed SAI program would cost about \$10 billion yearly.

On the geopolitical side, the technology's potential to alter weather patterns and benefit certain regions at the expense of others could trigger sharp opposition by some nations. Others might seize on SAI's benefits and back away from their commitment to carbon dioxide reductions. And, as with other breakthrough technologies, global norms and standards are lacking to guide the deployment and implementation of SAI.

Moreover, as we have seen with just about every scientific leap forward, new technologies often carry substantial risks to the same degree that they hold tremendous promise.

Nowhere are the stakes higher for our national security than in the field of biotechnology. Recent advances in genome-editing that offer great potential for breakthroughs in public health are also cause for concern, because the same methods could be used to create genetically-engineered biological warfare agents. And though the overwhelming majority of nation states have tended to be rational enough to refrain from unleashing a menace with such unpredictable consequences, a subnational terrorist entity such as ISIL would have few compunctions in wielding such a weapon.'

2016 April 22 Signing of the Paris Agreement by 195 countries, it marked a watershed moment for determining, planning and documenting measures to mitigate man-made global warming.

2016 cloud seeding flights by CSRIO in Tasmania stopped in June after 6 decades of work, following severe floods in that year that led to widespread devastation and loss of life. You can turn the tap on but how do you turn it off?

2017 August, withdrawal from the Paris Agreement by the Trump administration delivered an official notice to the United Nations as soon as eligible on 4 November 2020. **20 January 2021 Biden on his first day of office re-entered the Paris Agreement.**

2018 China using weather modification over a total area of about 1.6 million square kilometres. From the Tibetan mountains tens of thousands of chambers will be built by China Aerospace Science and Technology Corporation to burn silver oxide

at selected locations across the Tibetan plateau to produce rainfall over three times the size of Spain. Other countries like the United States have conducted similar tests on small sites.

Today China needs more water. So it's building a rain-making network three times the size of Spain <https://www.todayonline.com/world/china-needs-more-water-so-its-building-rain-making-network-three-times-size-spain>

2019 National Defense Authorization Act – signed into law in August 2018 featured repeated references to *“space warfighting operations”*, and plans to create a *“unified command for space”* under US Strategic Command. there is *“limited international agreement on norms and conventions”* relating to the regulation of space technology, combined with *“a lack of ethical standards to encourage their responsible use”*.

2019 space force- a team is inaugurated but in reality, it's about unseen, unmanned objectives in space. Forming the first American military branch in more than 70 years. The last of the Milstar military satellites is launched and placed under US space force authority.

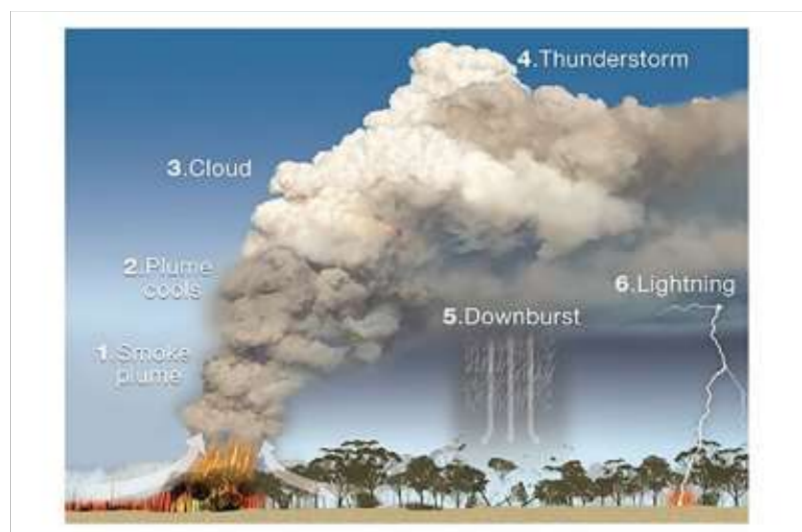

2019 Sydney Warragamba Dam: two-year caveat that's been placed on Warragamba Dam by the World Heritage Committee, Sydney Water won't be able to make any changes to the dam until the Federal Government submits an impact statement to the UNESCO World Heritage Committee. This occurred during record drought and water shortages. Wide

spread flooding followed in 2020, 2021 & 2022.

2019/2020 wild fires in Australia burn for months starting in August 2019 and continuing into 2020 from Queensland to Victoria with the smoke from the fires. 14 million acres of land was destroyed, killing more than 20 people and an estimated 1 billion animals. Obama and Pope Francis are amongst those pointing to this as a result of climate change and need for action. The drought precenting this event and change of ground clearing measures following UN climate strategies allowed catastrophic fires to occur. The same result of catastrophic fires is seen in the US from Agenda 2021 policies. The fires created their own storm called a 'fire tornado' with lightening proceeding ahead of the storm destroying homes and lives with whole towns evacuated by police and SES.

2020 NEWS: China Threatens India with A Weather Modification System expansion: There are 34 private companies worldwide that do weather modification, but there's no bigger rival in aerial cloud seeding than the Chinese government, that can cover 1.5 times the area of India which is expected to be complete in 2025

THE MAIN PLAYER REVEALS HIMSELF

2020 December Vatican forms the Council for Inclusive Capitalism (What does inclusive capitalism mean? An exclusive Communist agenda.) with Lady Rothchild heralding the new foundation. Its 'globalization on steroids, the Vatican has announced it will form a *"historic partnership"* with big business, known as the Council for Inclusive Capitalism. You can't make this stuff up. And make no mistake: this is no mere talk shop, but rather a vast undertaking that involves *"more than \$10.5 trillion in assets under management, companies with over \$2.1 trillion of market capitalization, and 200 million workers in more than 163 countries."*

The Club of Rome at the UN Climate talks

27 October 2021 – We are at a unique moment in history – a decisive decade where failure to act risks crossing irreversible Earth tipping points. The 26th UN Climate Change Conference of the Parties (COP26) is seen as a critical summit to accelerate action towards the goals of the Paris Agreement and the UN Framework Convention on Climate Change. The Club of Rome takes part in a number of events during the two-week conference, taking place in Glasgow on 31 October – 12 November 2021.

Below are selected highlights of the Club of Rome participation and co-organised events.

Representatives from the Club of Rome will be in Glasgow from 1-10 November. In case of questions, you should be able to find us in the Nature+ Newsroom located opposite the main entrance to COP26 (Blue Zone, Scottish Event Campus (SEC), Hall 4). Contact details for questions, speaking opportunities, media inquiries are at the bottom of the page.

Some people are angry blaming the Prime Minister for climate change inaction and the anger is deserved if they refuse to speak the truth. Climate change is a deliberate action plan.

So, what's the idea:
'Build back better'

You have to ask yourself how much is spent from your pocket on finite resources or for funded the United Nations, while the poor subsist. It's really not the most pressing question on their minds.

The US declaration of global interdependence the complete version reads 'When in the course of history the threat of extinction confronts mankind, it is necessary for the people of the United States to declare their interdependence with the people of all nations and to embrace those principles and build those institutions which will enable mankind to survive and civilization to flourish. Two centuries ago our forefathers brought forth a new nation; now we must join with others to bring forth a new world order. On this historic occasion it is proper that the American people should reaffirm those principles on which the United States of America was founded, acknowledge the new crisis which confronts them, accept the new obligations which history imposes upon them, and set forth the causes which impel them to affirm before all people their commitment to a Declaration of Interdependence. We hold these truths to be self-evident: that all men are created equal; that the inequalities and injustices which afflict so much of the human race as the product of history and society, not of God or nature; that people everywhere are entitled to the blessings of life and liberty, peace and security and the realization of their full potential; that they have an inescapable moral obligation to preserve those rights for posterity; and that to achieve these ends all the peoples and nations of the globe should acknowledge their interdependence and join together to dedicate their minds and their hearts to the solution of those problems which threaten their survival. To establish a new world order of compassion, peace, justice and security. It is essential that mankind free itself from the limitations of national prejudice, and acknowledge that the forces that unite it are incomparably deeper than those that divide it – that all people are part of one global community, dependent on one body of resources, bound together by the ties of a common humanity and associated in a common adventure on the planet earth. Let us then join together to vindicate and realize this great truth that mankind is one, and as one will nobly save or irreparably lose the heritage of thousands of years of civilization to survive.' Signed by 128 members of congress at Independence Hall in Philadelphia, Pennsylvania now a UNESCO world heritage site, in which both the United States Declaration of Independence and the United States

Constitution were debated and adopted by America's Founding. This change in US history is not publicized. This follows the words of Kessinger in 1975 that it is first time in history to form a truly global society.

Affirmations

WE AFFIRM that the resources of the globe are finite, not infinite, that they are the heritage of no one nation or generation, but of all peoples, nations and of posterity, and that our deepest obligation is to transmit to that posterity a planet richer in material bounty, in beauty and in delight than we found it. Narrow notions of national sovereignty must not be permitted to curtail that obligation.

WE AFFIRM that the exploitation of the poor by the rich, and the weak by the strong violates our common humanity and denies to large segments of society the blessings of life, liberty, and happiness. We recognize a moral obligation to strive for a more prudent and more equitable sharing of the resources of the earth in order to ameliorate poverty, hunger and disease.

WE AFFIRM that the resources of nature are sufficient to nourish and sustain all the present inhabitants of the globe and that there is an obligation on every society to distribute those resources equitably, along with a corollary obligation upon every society to assure that its population does not place upon Nature a burden heavier than it can bear.

WE AFFIRM our responsibility to help create conditions which will make for peace and security and to help build more effective machinery for keeping peace among nations. Because the insensate accumulation of nuclear, chemical, and biological weapons under international supervision. We deplore the reliance on force to settle disputes between nation states and between rival groups within such states.

WE AFFIRM that the oceans are the common property of mankind whose dependence on their incomparable resources of nourishment and strength will, in the next century, become crucial for human survival, and that their exploitation should be so regulated as to serve the interests of the entire globe, and of future generations.

WE AFFIRM that the pollution flows with the waters and flies with the winds, that it recognizes no boundary lines and penetrates all defenses, that it works irreparable damage alike to Nature, and to Mankind – threatening with extinction the life of the seas, the flora and fauna of the earth, the health of the people in cities and the countryside alike – and that it can be adequately controlled only through international cooperation.

WE AFFIRM that the exploration and utilization of outer space is a matter equally important to all the nations of the globe and that no nation can be permitted to exploit or develop the potentialities of the planetary system exclusively for its own benefit. WE AFFIRM that the economy of all nations is a seamless web, and that no one nation can any longer effectively maintain its processes of production and monetary systems without recognizing the necessity for collaborative regulation by international authorities.

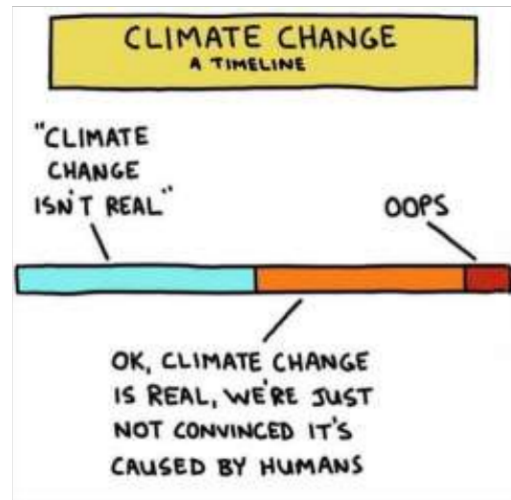

WE AFFIRM that in a civilized society, the institutions of science and the arts are never at war and call upon all nations to exempt these institutions from the claims of chauvinistic nationalism and to foster that great community of learning and creativity whose benign function is to advance civilization and the health and happiness of mankind.

WE AFFIRM that a world without law is a world without order, and we call upon all nations to strengthen and to sustain the United Nations and its specialized agencies, and other institutions of world order, and to broaden the jurisdiction of the World Court, that these may preside over a reign of law that will not only end wars but end as well that mindless violence which terrorizes our society even in times of peace. We can no longer afford to make little plans, allow ourselves to be the captives of events and forces over which we have no control, consult our fears rather than our hopes. We call upon the American people, on the threshold of the third century of their national existence, to display once again that boldness, enterprise, magnanimity and vision which enabled the founders of our republic to bring forth a new nation and inaugurate a new era in human history. The fate of humanity hangs in the balance. Throughout the globe, hearts and hopes wait upon us. We summon all Mankind to unite to meet the great challenge. —Henry Steele Commager WORLD AFFAIRS COUNCIL OF PHILADELPHIA 1975 October 24, 1975

Behind the curtain

The players in the following scene all turn up to the stage as the saviours and heroes but they are really the villains unbeknown to the audience and the actors have their shirts turned inside out. To distract their audience, they have the word hero blazed across their shirt so the audience does not realise who they are till the final scene.

The importance of the information given, is that every nation of the world (perhaps with the exception of Syria) practically has been led to the table on the Paris agreement for climate change, which is based on the Pope's 2015 encyclical.

What does this mean? The Pope is leading in planetary climate action campaigns to regain the power it formally had in the Middle Ages. It has the united actions of the UN with its occult figures that follow Gaia and the support of big business, particularly the complicate media and the political world.

The argument is the urgent action of the nations to meet climate targets and changing their economies technologies and financial systems for the crisis.

The way for global government is being paved through a false science as forewarned.

Thus, the false science of the present day, which undermines faith in the Bible, will prove as successful in preparing the way for the acceptance of the papacy, with its pleasing forms, as did the withholding of knowledge in opening the way for its aggrandizement in the Dark Ages. {Great Controversy 572.3 by E G White published 1888}

Jesus asks a pertinent question relevant for us today. Matthew 16:3 can ye not discern the signs of the times?

The prophecies concerning the United States:

Revelation 3:11 And I beheld another beast coming up out of the earth; and he had two horns like a lamb, and he spake as a dragon. 13:12 And he exerciseth all the power of the

first beast before him, and causeth the earth and them which dwell therein to worship the first beast, whose deadly wound was healed. 13:13 And he doeth great wonders, so that he maketh fire come down from heaven on the earth in the sight of men, 13:14 And deceiveth them that dwell on the earth by [the means of] those miracles which he had power to do in the sight of the beast;

This prophecy has several layers to it as does Isaiah 14. Revelation 13 first address the nation acting to implement world government; that is the USA gives homage to the church of Rome. It causes fire to come down from heaven in the sight of men. This power it has at this very time and for the first time in history. By its might and power, it causes the earth to homage the beast from the ('holy') see under threat of no buying or selling.

This prophecy is also speaking of Lucifer himself:

It is the lying wonders of the devil that will take the world captive, and he will cause fire to come down from heaven in the sight of men. He is to work miracles, and this wonderful, miracle-working power is to sweep in the whole world.--2SM 51 (published 1890). {LDE 167.3} In this age antichrist will appear as the true Christ, and then the law of God will be fully made void in the nations of our world. Rebellion against God's holy law will be fully ripe. But the true leader of all this rebellion is Satan clothed as an angel of light. Men will be deceived and will exalt him to the place of God, and deify him. But Omnipotence will interpose, and to the apostate churches that unite in the exaltation of Satan, the sentence will go forth, "Therefore shall her plagues come in one day, death, and mourning, and famine; and she shall be utterly burned with fire: for strong is the Lord God who judgeth her" [Revelation 18:8].--TM 62 (published 1893). {LDE 168.2}

It is for this reason because of the destruction of the natural world and the abolition of individual rights and freedoms, God stands up for His people and brings judgments upon the world. At the same time Lucifer the destroyer has come as the saviour of mankind presenting Himself as Christ's foretold return the second time and a strong warning is given in Revelation 14 not to worship this false god.

While an elite occult body has thought to restrict and take people away from the rural areas through UN Agencies such as ICLEI, God has told His people to go to the country as soon as possible: Again and again the Lord has instructed that our people are to take their families

away from the cities, into the country, where they can raise their own provisions, for in the future the problem of buying and selling will be a very serious one. We should now begin to heed the instruction given us over and over again: Get out of the cities into rural districts, where the houses are not crowded closely together, and where you will be free from the interference of enemies.--2SM 141 (published 1904). {LDE 99.4}

The end is near and every city is to be turned upside down every way. There will be confusion in every city. Everything that can be shaken is to be shaken and we do not know what will come next. The judgments will be according to the wickedness of the people and the light of truth that they have had.--1MR 248 (published 1902). {LDE 111.3}

O that God's people had a sense of the impending destruction of thousands of cities, now almost given to idolatry.--Ev 29 (published 1903). {LDE 111.4}

The time is near when large cities will be swept away, and all should be warned of these coming judgments.--Ev 29 (published 1910). {LDE 111.5}
